

Audit report — Preface, Introduction, Chapter 1 (and book-wide sweep)

Read-only. Nothing in `HTR_Book_v42.docx` was changed. Source read: `word/document.xml` of the docx as it is today. Every row below says what I opened. "Not checked" means exactly that.

Files: `book-audit/stale_facts_sweep.md` (full sweep, every hit with location) · `book-audit/extract_book.py` · `book-audit/sweep_stale_facts.py` · `frontend/scripts/audit-book-academy-refs.mjs` (queries the real Academy database).

1. Link and promise truth table (Preface, Introduction, Chapter 1)

Verdicts: **DELIVERS** = a reader finds what the sentence says · **PARTLY** · **DOES NOT DELIVER** · **NOT CHECKED**.

#	Where	The promise	What I opened	What a reader finds	Verdict
1	Preface, Intro	Read the book online with audio at /book	<code>app/book</code> , <code>app/book/listen</code> , Playwright	Both pages render (test passes)	DELIVERS
2	Preface, Intro	"Five pillar hubs"	<code>app/{policy, technology, economics, clinical, operations}</code> , <code>app/equity</code>	All five exist; <code>/equity</code> is the Imperative hub	DELIVERS
3	Preface, Intro	Research Lab of "nearly forty" tools	<code>lib/taxonomy/tools.ts</code>	39 registry entries. Not checked: how many the hub page renders	PARTLY
4	Preface, Intro	"An AI Analyst grounded in this book"	backend indexing config; runbook	Book is registered for indexing, but I have NOT run the ingest, so I cannot confirm the live index contains it	NOT CHECKED
5	Preface, Intro	Each chapter ends with an "Explore on the Platform" guide	headings in all 16 chapters	16 of 16 have one	DELIVERS
6	Preface, Intro	...and a "Go Deeper — Academy" guide	"GO DEEPER" text in all 16 chapters	Only Chapter 1 has one. Chapters 2–16: none.	DOES NOT DELIVER
7	Preface, Intro	Platform tools carry "From the Book" callouts "on every hub and tool"	files importing <code>FromTheBook</code>	9 files: Five-Pillar Map, HTR Simulator, Impact Simulation, Friction Index, Operations hub, Research Lab hub, pillar overviews. Not on the Transformation Scorecard (which Chapter 1 cites)	PARTLY
8	Intro	Companion course has "eight tracks"	Supabase	8 tracks, all published	DELIVERS
9	Intro	Track 2 "Policy — Establish the Mandate", Track 4 "Economics — Put Incentives on a Visible System", Track 6 "Operations — Close the Execution Gap"	Supabase	Numbers and titles match exactly	DELIVERS
10	Intro	Open /academy/getting-started, "declare your role, and the platform personalizes"	<code>app/academy/getting-started/page.tsx</code>	The page is a guide; it tells you to go to the Welcome page and click your role there. Declaring happens elsewhere	PARTLY
11	Intro	Payment-reform courses at /academy/courses; Value-Based Care course	<code>app/academy/courses</code> , Supabase	/academy/courses is an alias of the tracks listing; <code>value-based-care</code> and <code>hospital-finance</code> are published	DELIVERS

#	Where	The promise	What I opened	What a reader finds	Verdict
12	Intro	"The Vermont-specific Medicaid Learning Center is at /academy"	<code>app/academy/medicaid</code> , sidebar	It exists at <code>/academy/medicaid</code> ("Medicaid Learning Center"), linked from the sidebar; I found no link from <code>/academy</code> itself. "Vermont-specific" not verified	PARTLY
13	Intro	Vermont concept pages (Act 167, Act 68, AHEAD Model) + hospital dashboard	route files	All exist. <code>/ahead-model</code> mentions the withdrawal once; I did not read whether it still presents Vermont as a participant	PARTLY
14	Intro	Policy & Quality Sciences bench; Payment Models & VBC bench with VBC Readiness Assessment and APM tools; Hospital Financial Stress Test	route dirs, <code>tools.ts</code>	Benches and all three tools exist	DELIVERS
15	Ch1 §1.3 box	HTR Simulator "scores an initiative or a state across the five pillars, applies the Equity Imperative as a justice check, and shows where the sequence breaks "	<code>app/htr-simulator</code> , <code>app/vermont-act-167/simulator/*</code> , oregon/california/dashboard simulators; repo-wide search	<code>/htr-simulator</code> is an overview page linking to four simulators that score <i>policy scenarios</i> and show an equity view. No tool anywhere contains gate/upstream/downstream logic. The last clause is not delivered	DOES NOT DELIVER (last clause)
16	Ch1 §1.3 box	Track 1 teaches the gate test (Lesson 4) and works OneCare (Lesson 5)	Supabase, lesson text	Titles match; Lesson 4 = gate test, Lesson 5 = OneCare	DELIVERS
17	Ch1 §1.3 box	Scorecard "returns your weakest load-bearing pillar"	<code>TransformationScorecard.tsx</code>	Computes and shows the weakest pillar	DELIVERS
18	Ch1 §1.3 box	Act 68 / Act 167 / AHEAD / hospital dashboard / chat "carry the live version of this chapter's Vermont evidence"	route files	Routes exist; content not compared to the chapter's evidence	PARTLY
19	Ch1 §1.4, §1.15	Five-Pillar Map at <code>/about/framework</code> : interactive, click a pillar to highlight what it enables and depends on	<code>FivePillarFrameworkMap.tsx</code>	Interactive (selection state), 9 dependency entries in code. Not viewed rendered	DELIVERS
20	Ch1 §1.15	HTR Simulator: "Drop one pillar's score to zero and observe the cascade — the simulator penalizes downstream readiness"	same as #15	No per-pillar score input; no downstream penalty	DOES NOT DELIVER
21	Ch1 §1.15	Friction Index: "quantify where reform is losing momentum and which pillar is the binding constraint"; "identify your Technology gate bottleneck"	<code>app/transformation-friction-index/page.tsx</code>	Scores friction per pillar (Policy, Economics, Technology, Clinical, Operations, Equity). The text talks about binding constraints, but I found no code that computes or names one, and no "Technology gate"	PARTLY
22	Ch1 §1.15	Impact Simulation: "model how one pillar's shortfall propagates through the other four over time ... a	<code>app/impact-simulation/page.tsx</code>	Shows one scenario's impact on all five pillars simultaneously . I found no lag/time-propagation logic and no "one pillar's shortfall" input	DOES NOT DELIVER

#	Where	The promise	What I opened	What a reader finds	Verdict
		Technology gap shows up in Economics results a year later"			
23	Ch1 §1.15 TRY THIS	Build a profile with high Economics, voluntary Policy, no real-time data; "the composite score should collapse"	same as #15	Cannot be built or observed in any tool	DOES NOT DELIVER
24	Ch1 §1.12.3 TRY THIS	Model an organization that funds a downstream pillar before its upstream gate opens; watch composite readiness collapse; then use the Friction Index to see the binding constraint	same as #15, #21	First half not possible; second half partly (see #21)	DOES NOT DELIVER
25	Ch1 §1.12.3, §1.16	Go Deeper: Lessons 4 and 5; Figure 1.10 lists Track 1's five lessons	Supabase	All five lesson titles match the database exactly	DELIVERS

My own earlier error, stated plainly: earlier this session I wrote the §1.3 box's Simulator sentence after checking the page's own marketing excerpt ([htr-simulator/page.tsx:266](#), "this simulator enforces the dependency logic Chapter 1 argues"). That text is a claim on the page, not behaviour. The code does not do it. Rows 15, 20, 23, 24 are all the same root cause: **no tool implements the gate/penalty logic the chapter tells readers to watch**. The same untrue claim is also printed on the platform pages themselves ([htr-simulator](#), [impact-simulation](#), [transformation-friction-index](#) excerpts).

Whether to fix the book's wording or build the behaviour into the tools is your decision. Directive 16/17: I have changed neither.

2. Stale facts across the whole book (full list in [stale_facts_sweep.md](#))

Subject	What I found
AHEAD after Vermont's July 2026 withdrawal	37 sentences flagged as present/future tense with no withdrawal mention, in Ch1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12, 13, 14, 15, Conclusion, App A, App G. Examples: Ch14 §14.2.1 "The AHEAD State Agreement ... is a binding federal-state agreement with a nine-year performance period"; Conclusion "The AHEAD performance year begins in January 2028"; Ch12 "AHEAD's January 2028 launch is a federal decision"
"first AHEAD performance year"	6 sentences: Ch1 §1.17, Ch3 §3.9, Ch4 §4.10, Ch10 §10.18, Ch11 §11.18, Conclusion
EAST Fund	Ch1 Figure 1.6, Ch2, Ch6 (×2), Ch15 (×2), Ch16, Conclusion give "up to \$150M annually" as current. Intro and Ch1 "What Earns a Place" say ~\$138M expected, cut to ~\$10M. Appendix G is the only place that says it "will not arrive at all". I have not verified whether \$150M (agreement cap) and \$138M (expected) are both legitimate figures.
\$195M RHT award	13 sentences describe it as annual / per-year (Ch1 Fig 1.6, Ch2 ×3, Ch6, Ch11, Ch14, Ch15 ×2, App E, App G ×2 incl. "about \$1 billion in total"). Appendix G's glossary says "\$195M for its first year, awarded annually". Ch1 is inconsistent with itself: Fig 1.6 "\$195M/yr" vs §1.11.1 "first year, with comparable annual awards expected" vs "What Earns a Place" "first-year award". I verified earlier in this session that it is the first-year award; I have not re-verified it now and have no source open.
Six-pillar wording	4 hits; all are the deliberate "not a sixth pillar" statements. Clean
Date anchor	Intro says "written in real time" with no date. Conclusion, Ch13, Ch14, App E, Bibliography anchor "as of April 2026" — before the July 2026 events the same book reports

3. Conflicts between Preface / Introduction and Chapter 1

The Introduction (written in the docx today) states Vermont withdrew from AHEAD in July 2026 and the EAST Fund was cut to ~\$10M. Chapter 1 contradicts that in these places, and contradicts its own §1.14 ("subsequently withdrawn July 2026"):

- §1.3 Policy line: "the AHEAD Model State Agreement ... are Vermont's Policy pillar interventions"
- Figure 1.5 (§1.7): "AHEAD Model State Agreement (January 2025)"; "AHEAD total cost of care accountability"

- §1.10.3: "designing the AHEAD global budget methodology in parallel"
- §1.11.1: "The AHEAD Model federal agreement layered in the federal funding that made the technology build feasible"
- Figure 1.6 (§1.11.5 row): "AHEAD State Agreement; \$195M/yr RHT award" and "EAST Fund up to \$150M annually"
- §1.14.1: "the financial management capability for AHEAD"
- §1.17: "your first AHEAD performance year"; "ahead of AHEAD's clinical accountability requirements"
- §1.18: EAST Fund listed as current transformation capital

Correction to what I told you earlier: I said the Introduction says "\$195M/year" and conflicts with my Chapter 1. That was true of the PDF I was shown, not of your docx. The current Introduction gives no dollar figure. There is no Intro/Chapter 1 conflict on the \$195M. The inconsistency is inside Chapter 1 (above).

Also noted: Chapter 1 has two "Go Deeper" boxes (§1.12.3 and §1.16) and two "TRY THIS" boxes (§1.12.3 and §1.15).

4. The two tables to look at in Google Docs (I cannot see Google Docs)

After upload, look at these two. Before the fix they showed black text on a dark navy header row:

1. §1.3, "THE EQUITY IMPERATIVE — APPLIED AT EVERY STAGE" table — first row starts "Policy | Permissible — and does the mandate close disparities or widen them?"
2. §1.3, platform box after Figure 1.2 — first row starts "Diagnostic | The HTR Simulator (...)"

What the file now says (XML): both have no style-painted header row, row-1 cell fill white (ffffff) / light blue (edf2f9), text 111111. check_format.py: clean, 196 tables. If either still shows a dark first row, tell me which and I will look at the XML again.

5. Platform

- e2e: smoke.spec.ts now expects the brand name the tested host actually renders (uses lib/brand.ts, the four-domain logic) and waits for domcontentloaded (the /book page embeds a 1.7 MB PDF and took ~25s to reach load). Full Playwright suite: 18 of 18 pass.
- AI Analyst ingest: NOT RUN. Runbook: curl -X POST http://localhost:8000/api/ingest with the backend running locally ("run ingestion locally, not against Fly"). It writes to the pgvector store and incurs embedding charges. I did not run it. Until it is run, book row #4 above is unconfirmed.
