1. Executive Overview

The HTR Advisory Section is a full-spectrum health policy and transformation consulting practice embedded within the Health Transformation Research platform. It serves as the primary commercial interface between HTR's research capabilities and the organizations seeking to translate evidence into operational change.

Mission Statement

Transform health system performance through rigorous, evidence-based advisory services that integrate policy intelligence, economic modeling, clinical quality science, and technology strategy into actionable transformation roadmaps.

Scope of Practice

HTR Advisory operates across five domains of health system transformation:

- **Policy & Regulatory Navigation** — Federal and state health policy interpretation and strategy
- **Economic & Financial Modeling** — Total cost of care analysis, payment reform design, actuarial review
- **Technology Strategy** — Health IT assessments, interoperability roadmaps, digital transformation
- **Clinical Quality Improvement** — HEDIS, Star Ratings, MIPS/QPP, value-based care performance
- **Health Equity & Population Health** — SDOH integration, disparity reduction, community health strategy

Core Value Proposition

HTR differs from traditional management consulting firms through:

- 1. **Research-First Methodology:** Every engagement anchored in peer-reviewed evidence and proprietary data
 - 2. **Five-Pillar Framework:** Simultaneous analysis across Policy, Economics, Technology, Clinical, and Equity dimensions
 - 3. **Vermont Expertise:** Deep knowledge of Green Mountain Care Board, ACO regulations, and small-state dynamics
 - 4. **Tool Integration:** Clients access the Research Lab during engagements for live scenario modeling
 - 5. **Implementation Focus:** Deliverables are designed to move directly into project execution
-

2. Advisory Section Architecture

URL Structure

<code>/advisory</code>	→ Main landing page (hero, 8-service grid, 5-pillar section)
<code>/advisory-hub</code>	→ Card grid hub – entry point to all 10 service/action areas
<code>/advisory/consulting</code>	→ Strategic consulting service line
<code>/advisory/research</code>	→ Research & analysis service line
<code>/advisory/it-consulting</code>	→ Health IT consulting service line
<code>/advisory/independent-review</code>	→ Independent quality review service line
<code>/advisory/capability-assessment</code>	→ Organizational capability assessment
<code>/advisory/financial-audit</code>	→ Financial & actuarial audit service line
<code>/advisory/regulatory</code>	→ Regulatory & compliance service line
<code>/advisory/training</code>	→ Training & workforce development service line
<code>/advisory/reports</code>	→ HTR impact reports library
<code>/advisory/services</code>	→ Full services overview
<code>/advisory/approach</code>	→ HTR methodology deep-dive
<code>/advisory/contact</code>	→ Engagement intake form

Advisory Hub Design (v3 — Card Grid)

`/advisory-hub` is a **Server Component card grid** — no tabs, no horizontal scrolling.

- Light gray/white/fuchsia gradient hero (NOT dark/black background)
- Stats row: 4 key metrics from `ADVISORY_STATS`
- 10 cards in a **responsive grid** (3-col → 2-col → 1-col), each card has:
 - Colored left border accent per service
 - Icon, service name, pillar tags, description
 - "Explore →" button linking to the individual service page
- Bottom row: Methodology link, Services Overview link, Book a Discovery Call CTA

Deleted: `app/advisory-hub/AdvisoryClientPage.tsx` — the old 10-tab `HubPageTemplate` wrapper no longer exists. The hub is a pure Server Component with no client-side tab state.

Component Hierarchy

<code>app/advisory/page.tsx</code>	(Server Component – main landing)
<code>app/advisory-hub/page.tsx</code>	(Server Component – card grid hub)
<code>app/advisory/consulting/page.tsx</code>	(Server Component)
<code>app/advisory/research/page.tsx</code>	(Server Component)
<code>app/advisory/it-consulting/page.tsx</code>	(Server Component)
<code>app/advisory/independent-review/page.tsx</code>	(Server Component)
<code>app/advisory/capability-assessment/page.tsx</code>	
<code>app/advisory/financial-audit/page.tsx</code>	
<code>app/advisory/regulatory/page.tsx</code>	
<code>app/advisory/training/page.tsx</code>	
└─ <code>app/advisory/approach/page.tsx</code>	
└─ <code>app/advisory/contact/page.tsx</code>	
└─ <code>app/advisory/contact/ContactForm.tsx</code>	(Client Component)

Data Layer

<code>frontend/lib/advisory-data.ts</code>
--

Central data file containing all advisory content, interfaces, and constants.

Exported Interfaces:

- EngagementStep — workflow step definition (title, description, duration, icon)
- PricingTier — service tier configuration (name, price, features array, recommended flag)
- AdvisoryService — full service definition (id, title, description, features, outcomes, stats)
- AdvisoryStat — KPI display card (value, label, description)
- ClientSegment — client type definition (name, description, examples, services array)

Exported Constants:

- ADVISORY_STATS — 8 performance statistics shown on landing page
- CLIENT_SEGMENTS — 5 client segment definitions
- ADVISORY_NAV_ITEMS — navigation link array
- ADVISORY_SERVICES — 8 complete service objects

3. Service Lines

3.1 Strategic Consulting (/advisory/consulting)

Core Purpose: Transform organizational vision into executable health system strategies.

Service Offerings:

- Health system transformation strategy and roadmap development
- Payment model design and alternative payment model (APM) navigation
- Merger, acquisition, and partnership strategy in value-based care
- Market entry and competitive positioning for new service lines
- Board and executive advisory on regulatory and policy matters

Engagement Formats:

- Strategy sprint (4–6 weeks) — rapid assessment and roadmap
- Ongoing advisory retainer (monthly or quarterly check-ins)
- Project-based engagements (3–12 months)
- Board advisory and expert witness services

Typical Deliverables:

- Strategic roadmap with 3-year implementation milestones
- Competitive landscape assessment
- Financial modeling of strategic scenarios
- Board presentation deck with executive briefing

Target Clients: Health system CEOs, CFOs, Boards of Directors, State Medicaid Directors, payer VPs of Value-Based Care

3.2 Research & Analysis (/advisory/research)

Core Purpose: Produce rigorous, publication-quality research and policy analysis to support evidence-based decision-making.

Service Offerings:

- Policy brief development (state and federal health legislation)
- Systematic literature reviews and evidence syntheses
- Program evaluation design and implementation
- Health economic modeling (cost-effectiveness, budget impact)
- Comparative effectiveness research
- Regulatory comment development for CMS and ONC rulemaking

Research Methodologies:

- Systematic and scoping reviews (PRISMA-compliant)
- Cost-effectiveness analysis (CEA) and cost-utility analysis (CUA)
- Budget impact modeling (BIM)
- Health technology assessment (HTA) per ICER and NICE standards
- Qualitative inquiry (interviews, focus groups, ethnographic methods)
- Mixed-methods program evaluation

Typical Deliverables:

- Policy briefs (4–12 pages) suitable for legislative audiences
- Full research reports (20–80 pages) with executive summaries
- Peer-reviewed manuscript drafts
- Testimony preparation for legislative committees
- Regulatory comment letters

Target Clients: State health agencies, foundations, health systems seeking grant support, payers designing evidence-based benefit structures

3.3 Health IT Consulting (/advisory/it-consulting)

Core Purpose: Align health technology investments with clinical and operational transformation goals.

Service Offerings:

- EHR selection, optimization, and implementation oversight
- Interoperability strategy (HL7 FHIR, CDA, Direct Trust, TEFCA)
- Health information exchange (HIE) governance and design
- Data governance framework development
- Clinical decision support (CDS) design and validation
- Population health platform assessment and selection
- AI/ML use case identification, governance, and ROI analysis
- ONC certification readiness and compliance

Technical Competency Areas:

- **FHIR R4/R5:** Resource profiling, Implementation Guide authoring, SMART on FHIR apps
- **HL7 v2 to FHIR Migration:** ADT, ORM, ORU message transformation
- **Clinical Terminology:** SNOMED CT, LOINC, RxNorm, ICD-10-CM, CPT mapping
- **API Standards:** USCDI, Bulk FHIR (Group/\$export), CDS Hooks
- **Privacy & Security:** HIPAA, HITECH, 42 CFR Part 2, OAuth 2.0/SMART
- **Cloud Architecture:** AWS, Azure, GCP health data environments

Typical Deliverables:

- Technology assessment and vendor scorecards
- Interoperability roadmap (current-state to future-state)
- Data governance policy framework
- AI governance charter
- FHIR Implementation Guide (profile specifications)
- ONC compliance gap analysis

Target Clients: Hospital CIOs/CMIOs, HIE operators, state HIT coordinators, digital health startups, payers building data platforms

3.4 Independent Quality Review (/advisory/independent-review)

Core Purpose: Provide objective, external validation of quality programs, measurement systems, and organizational performance claims.

Service Offerings:

- HEDIS measure audit and improvement (independent validation)
- CMS Star Ratings analysis and improvement planning
- NCQA accreditation preparation and gap analysis
- TJC readiness assessment
- Quality program design review
- Performance dashboard validation
- Peer review of internal quality reports

Independence Standards: HTR follows URAC, NCQA, and CMS standards for independent review organizations (IROs). All independent reviews are conducted by staff with no financial relationship to the client's operational performance.

Typical Deliverables:

- Independent quality audit report
- HEDIS data validation findings
- Accreditation gap analysis with remediation roadmap
- Star Ratings improvement playbook (12-month action plan)

Target Clients: Managed care organizations, Medicare Advantage plans, ACOs, hospital quality departments, self-insured employers

3.5 Capability Assessment (/advisory/capability-assessment)

Core Purpose: Provide a structured, evidence-based evaluation of an organization's readiness and capacity for health transformation.

Assessment Dimensions:

1. **Leadership & Governance** — Board engagement, executive alignment, change management capability
2. **Clinical Quality Infrastructure** — Measurement systems, CDS maturity, provider engagement
3. **Data & Analytics** — Data governance, warehouse maturity, population health analytics capability
4. **Technology Platforms** — EHR optimization, interoperability, digital health tool integration
5. **Financial Resilience** — Revenue cycle performance, alternative payment model exposure, actuarial capacity
6. **Workforce & Culture** — Staff training investment, retention metrics, innovation culture indicators
7. **Community & Equity** — Community health needs assessment (CHNA) integration, SDOH data use, equity measurement

Assessment Methodology:

- Structured interviews with 15–30 stakeholders across organizational levels
- Document review (strategic plans, quality reports, financial statements, technology inventories)
- Benchmarking against national and regional peer organizations
- Validated scoring rubrics (1–5 scale per dimension)

Output: Capability maturity scorecard, heat map of gaps and strengths, prioritized 18-month improvement roadmap

Target Clients: Health systems undergoing strategic planning, ACOs entering new payment arrangements, state agencies evaluating grantee capacity, private equity-backed healthcare platforms

3.6 Financial & Actuarial Audit (/advisory/financial-audit)

Core Purpose: Deliver rigorous financial analysis and actuarial modeling to support payment reform, risk contracting, and regulatory compliance.

Service Offerings:

- Medical Loss Ratio (MLR) analysis and compliance review
- Risk adjustment validation (HCC v28, HHS-HCC, CDPS)

- Total Cost of Care (TCOC) benchmarking
- IBNR reserve analysis and claims lag modeling
- Actuarial Value (AV) calculation and metallic tier certification
- Premium rate development and rate filing support
- Financial impact modeling for payment model transitions
- Fraud, Waste, and Abuse (FWA) program review

Actuarial Standards: HTR's financial audit practice follows Actuarial Standards of Practice (ASOPs) issued by the Actuarial Standards Board, with consulting actuaries credentialed as FSA, MAAA, or FCAS as appropriate to the engagement.

Typical Deliverables:

- Actuarial report (signed by credentialed actuary)
- TCOC benchmark analysis with peer comparisons
- Risk score validation findings and correction recommendations
- Financial projection model (5–10 year horizon)
- Rate filing documentation

Target Clients: Insurance commissioners, Medicaid managed care plans, ACOs at financial risk, self-insured employers, state all-payer databases

3.7 Regulatory & Compliance (/advisory/regulatory)

Core Purpose: Navigate the complex federal and state regulatory environment to ensure compliance, optimize participation in government programs, and inform rulemaking.

Regulatory Coverage Areas:

- **CMS Programs:** Medicare Advantage, Part D, ACO REACH, MSSP, CMMI Innovation Models
- **ACA Regulations:** Essential Health Benefits, MLR, risk corridors, market rules
- **Medicaid:** 42 CFR Part 438 managed care rules, 1115 and 1915(b)/(c) waivers
- **HIPAA/HITECH:** Privacy, security, breach notification, 42 CFR Part 2
- **ONC Regulations:** 21st Century Cures Act, information blocking, certification criteria
- **Vermont-Specific:** Green Mountain Care Board (GMCB), Act 167, ACO regulations, all-payer model

Service Offerings:

- Regulatory impact analysis and compliance gap assessment
- CMS comment letter development
- Waiver application development (1115, 1915, Section 332)
- Audit defense and corrective action planning
- Compliance program design and training
- Lobbying support materials and legislative testimony preparation

Target Clients: Health plans, hospitals, ACOs, digital health companies, state Medicaid agencies, Congressional offices

3.8 Training & Workforce Development (/advisory/training)

Core Purpose: Build organizational capacity through structured education programs that translate complex health policy and technical content into practical skills.

Training Program Types:

Executive Leadership Programs:

- Health Transformation Leadership Intensive (2-day retreat format)
- Board Governance for Value-Based Care (half-day workshop)
- Policy Literacy for Health Executives (quarterly webinar series)

Clinical & Quality Staff Training:

- HEDIS Measure Mastery (3-module certificate program)
- MIPS/QPP Optimization Workshop
- Quality Improvement Methods (IHI Model for Improvement, PDSA, Lean)
- Population Health Analytics Fundamentals

Technology & Data Training:

- FHIR for Clinicians and Administrators
- Health Data Governance Essentials
- AI in Healthcare: Governance, Ethics, and Implementation
- EHR Optimization for Quality Reporting

Policy & Advocacy Training:

- Health Policy 101 for Clinical Leaders
- Medicaid Managed Care Navigation
- CMS Rulemaking Process and Public Comment Strategies

Delivery Formats:

- In-person workshops (half-day to 3-day)
- Virtual instructor-led training (VILT)
- On-demand e-learning modules
- Blended learning paths (self-paced + live coaching)
- Train-the-trainer programs for organizational scale

Customization: All programs customized to client's regulatory environment, payer mix, EHR platform, and organizational culture.

Certifications Offered:

- HTR Certificate in Health Transformation Leadership
- HTR Certificate in Value-Based Care Analytics
- HTR Certificate in Health IT & Interoperability

4. Client Segmentation Model

HTR Advisory serves five distinct client segments, each with tailored service packages and engagement approaches:

Segment 1: Health Systems & Integrated Delivery Networks (IDNs)

Description: Hospitals, multi-hospital systems, and physician-hospital organizations navigating the transition from fee-for-service to value-based models.

Primary Needs:

- Strategic direction for APM participation
- Quality infrastructure development for Star Ratings and HEDIS
- Technology modernization for interoperability and population health
- Workforce development at scale

Preferred Engagement Model: Multi-year strategic partnership with dedicated advisory team. Typically \$500K–\$3M annually.

Example Clients: Regional health systems in New England, rural critical access hospitals, safety net hospitals

Segment 2: Health Plans & Managed Care Organizations

Description: Commercial insurers, Medicaid MCOs, Medicare Advantage plans, and CHIP plans operating under CMS and state insurance department oversight.

Primary Needs:

- HEDIS performance improvement
- Star Ratings optimization (Medicare Advantage)
- Risk adjustment accuracy and compliance
- Network adequacy and actuarial rate development
- Regulatory compliance (MLR, ACA market rules)

Preferred Engagement Model: Annual retainer with project-based add-ons for specific regulatory filings or audits. Typically \$300K–\$2M annually.

Segment 3: State & Federal Government Agencies

Description: State Medicaid agencies, state health departments, HIE operators, and federal program offices.

Primary Needs:

- All-payer model design and evaluation
- 1115 waiver strategy and application support
- FHIR/interoperability policy development
- Program evaluation and reporting
- Legislative testimony and policy analysis

Preferred Engagement Model: Task order contracts (IDIQ or BPA structure), often through competitive procurement. \$50K–\$5M per task order.

Segment 4: ACOs & Value-Based Care Organizations

Description: MSSP ACOs, ACO REACH participants, direct contracting entities, and other organized delivery systems taking downside risk.

Primary Needs:

- TCOC benchmarking and performance analytics
- Risk stratification and care management program design
- Data sharing and interoperability strategy
- Actuarial review of shared savings/losses
- Population health program ROI modeling

Preferred Engagement Model: Project-based (6–18 months) with optional ongoing support. Typically \$150K–\$750K per engagement.

Segment 5: Digital Health Companies & Investors

Description: Health technology startups, established HIT vendors, private equity firms, venture capital, and health system innovation labs.

Primary Needs:

- Regulatory strategy (FDA, ONC, CMS coverage decisions)
- Clinical validation and evidence generation planning
- Market access strategy (Medicaid coverage, payer contracting)
- Due diligence support for M&A
- AI governance framework development

Preferred Engagement Model: Project-based (3–6 months for due diligence, 6–18 months for regulatory strategy). Typically \$75K–\$500K.

5. Pricing & Engagement Models

Tier 1: Essential Advisory

Price: \$2,500–\$7,500/month **Format:** Retainer-based, limited hours **Includes:**

- Monthly strategy call (90 minutes)
- Access to HTR Research Lab
- Monthly policy digest and regulatory alert
- Email/Slack advisory Q&A (5 questions/month)
- Annual capability assessment (light version)

Best for: Smaller organizations, single-issue advisory needs, organizations piloting HTR relationship

Tier 2: Strategic Partnership

Price: \$15,000–\$45,000/month **Format:** Deep retainer with dedicated team **Includes:**

- Weekly strategy sessions with senior advisors
- Unlimited Research Lab access with guided analysis
- Dedicated Slack channel with 24-hour response SLA
- Quarterly board presentations
- Full capability assessment
- Two project engagements per year (up to 40 hours each)
- Regulatory monitoring and alert service (real-time)

Best for: Health systems, MCOs, and state agencies seeking an embedded advisory capability

Tier 3: Enterprise Transformation

Price: Custom (typically \$500K–\$3M/year) **Format:** Full engagement team, multi-year commitment **Includes:**

- Dedicated multi-disciplinary team (5–12 FTEs equivalent)
- On-site presence as needed
- Full Research Lab white-label access for client staff
- Unlimited project scope within retainer
- C-suite coaching and board advisory
- Priority access to HTR proprietary datasets and models
- Annual strategic planning facilitation (2-day retreat)
- Publication co-authorship on research outputs

Best for: Large health systems, major payers, state governments undertaking multi-year transformation programs

Project-Based Pricing

For organizations not on retainer:

Service	Typical Range
Policy brief (single topic)	\$8,000–\$25,000
Capability assessment	\$35,000–\$85,000
HEDIS audit and improvement plan	\$50,000–\$150,000
Technology assessment	\$40,000–\$120,000
Actuarial review	\$25,000–\$75,000
1115 waiver application support	\$150,000–\$400,000
Full strategic plan	\$75,000–\$250,000

Service	Typical Range
Training program (custom)	\$15,000–\$60,000
Research report	\$20,000–\$100,000

6. Advisory Hub — Card Grid

Located at `/advisory-hub`. **Replaced the previous 10-tab horizontal-scrolling interface** (`AdvisoryClientPage.tsx`, now deleted). The hub is a pure Server Component — no client-side state, no tabs, no horizontal overflow.

Design

- **Hero:** Light `bg-linear-to-br from-slate-100 via-white to-fuchsia-50` gradient — no dark/black backgrounds
- **Stats row:** 4 key metrics pulled from `ADVISORY_STATS` (from `advisory-data.ts`)
- **10 service cards** in a responsive CSS grid (`grid-cols-1 md:grid-cols-2 xl:grid-cols-3`) — wraps naturally, never overflows horizontally

Cards (10 total)

Each card contains: colored left border, emoji icon, service name, pillar tags, description, and an "Explore →" button.

Card	Links To	Accent Color
Strategic Consulting	<code>/advisory/consulting</code>	Fuchsia
Custom Research & Analysis	<code>/advisory/research</code>	Sky
Health IT Consulting	<code>/advisory/it-consulting</code>	Indigo
Independent Review	<code>/advisory/independent-review</code>	Emerald
Capability Assessment	<code>/advisory/capability-assessment</code>	Amber
Financial & Actuarial Audit	<code>/advisory/financial-audit</code>	Green
Regulatory & Compliance	<code>/advisory/regulatory</code>	Rose
Training & Development	<code>/advisory/training</code>	Violet
Impact Reports	<code>/advisory/reports</code>	Slate
Start an Engagement	<code>/advisory/contact</code>	Fuchsia (CTA style)

Bottom Actions

Three links below the grid: "Our Methodology →", "Full Services Overview →", "Book a Discovery Call →"

Deleted Components

- `app/advisory-hub/AdvisoryClientPage.tsx` — removed entirely
- `HubPageTemplate` is no longer used for advisory (still used by Academy, Trending Topics, Multimedia)

7. Contact & Intake System

Located at `/advisory/contact`, the contact system (`ContactForm.tsx`) is a multi-stage intake form designed to qualify leads and route them to the appropriate service team.

Research Lab Referral Integration (v3)

`ContactForm.tsx` now reads URL query parameters set by the `LabAdvisoryCTA` component in the Research Lab. When a user clicks "Talk to an HTR Advisor →" from any Research Lab sub-page, three params are passed:

- `?from=research-lab` — triggers a fuchsia banner at the top of the form: "You came from the Research Lab — [category]"
- `?category=` — the Research Lab category (e.g. "Payment Models & VBC") shown in the banner and used to customize the textarea placeholder
- `?practice=` — the advisory practice label (e.g. "Strategic Consulting") which auto-selects the matching option in the Service of Interest dropdown via the `PRACTICE_TO_SERVICE_ID` map:

```
const PRACTICE_TO_SERVICE_ID: Record<string, string> = {
  "Health IT Consulting":      "it-consulting",
  "Strategic Consulting":      "consulting",
  "Regulatory & Compliance":   "regulatory",
  "Custom Research & Analysis": "research",
  "Financial & Actuarial Audit": "financial-audit",
}
```

The textarea placeholder is also customized: "I was using the [category] tools in the HTR Research Lab and would like HTR Advisory support to implement what I modeled. Specifically..."

This creates a direct conversion funnel from Research Lab analysis → Advisory engagement.

Form Architecture

Section 1: Organization Profile

- Organization name (required)
- Organization type (dropdown): Health System, MCO/Health Plan, State Agency, ACO, Digital Health Company, Employer, Foundation, Other
- Annual revenue range (dropdown): <\$50M, \$50M–\$250M, \$250M–\$1B, \$1B–\$5B, \$5B+
- Geography (multi-select state picker)
- Number of employees (range)

Section 2: Contact Information

- First and last name
- Title/Role
- Email address
- Phone number
- Preferred contact method (Email, Phone, Slack, Video call)
- Time zone

Section 3: Engagement Interest

- Service line of interest (multi-select from 8 services + "Not sure")
- Engagement urgency: Immediate (within 30 days), Near-term (1–3 months), Planning (3–6 months), Exploring (6+ months)
- Estimated engagement budget range
- Brief project description (free text, 500 char limit)

Section 4: Training-Specific Fields (conditionally displayed when Training selected)

- Number of staff to be trained
- Training format preference: In-person, Virtual, Blended, On-demand
- Target role(s) for training (multi-select)
- Scheduling constraints (free text)

Section 5: How Did You Hear About HTR

- Source tracking (dropdown + free text)
- Referral name (if applicable)

Form Logic

- Real-time validation on all required fields
- Conditional sections display based on Service Line selection
- Submission routes to CRM (Salesforce integration) + email notification to relevant practice lead
- Auto-response email sent to submitter within 2 minutes

8. Technical Architecture

Frontend Stack

- **Framework:** Next.js 14+ App Router
- **Language:** TypeScript (strict mode)
- **Styling:** Tailwind CSS v4 (utility-first, no component library)
- **Icons:** lucide-react
- **State Management:** React useState / useReducer (no external state library)
- **Forms:** Controlled components with custom validation (no form library)

Rendering Strategy

Route	Rendering	Reason
/advisory	Server Component	Static content, SEO-critical
/advisory/[service]	Server Component	Static content, SEO-critical
/advisory-hub	Server Component (shell)	SEO for route
/advisory-hub/AdvisoryClientPage	Client Component	Tab state, interactive
/advisory/contact/ContactForm	Client Component	Form state, validation

Data Flow

Performance Considerations

- All service pages are statically generated at build time (no runtime data fetching)
- Images served via Next.js Image component with WebP optimization
- Advisory Hub is a pure Server Component — no JavaScript bundle for the hub page itself
- Contact form validation runs client-side to minimize server round-trips

SEO Configuration

Each advisory page includes:

- Unique <title> tag (format: {Service Name} | HTR Advisory)
- <meta name="description"> (150–160 chars)
- Open Graph tags for social sharing
- Structured data (JSON-LD, Service and Organization schema)
- Canonical URLs

9. Navigation & Information Architecture

Primary Navigation (Header)

The `Header.tsx` main nav contains only the **5 pillars**: POLICY, ECONOMICS, TECHNOLOGY, CLINICAL, EQUITY.

Advisory is NOT in the main header nav. It is accessed via the home sidebar. The `ADVISORY_NAV_ITEMS` constant remains in `advisory-data.ts` for potential future use but is not imported or rendered in `Header.tsx`.

How Users Reach Advisory

- Home sidebar → Advisory Hub link → `/advisory-hub`
- Direct URL to any `/advisory/*` service page
- "Talk to an HTR Advisor →" CTA on Research Lab sub-pages → `/advisory/contact` (pre-filled)

Internal Linking Strategy

- Every service page links to related services ("You might also need...")
- All service pages link to Advisory Hub and Contact
- Advisory Hub Tab 2 (Services) links to all individual service pages
- Footer includes full advisory sitemap

10. HTR Five-Pillar Methodology

All HTR Advisory engagements are structured around the proprietary Five-Pillar Framework, ensuring comprehensive, multi-dimensional analysis:

Pillar 1: Policy

Focus: Regulatory environment, legislative landscape, government program requirements **Tools Used:** Regulatory impact analysis, waiver modeling, legislative tracking, comment letter development **Questions Answered:** What rules govern this? What is changing? How do we position for regulatory advantage?

Pillar 2: Economics

Focus: Financial sustainability, payment model alignment, total cost of care, actuarial soundness **Tools Used:** TCOC modeling, APM financial projections, budget impact analysis, premium development **Questions Answered:** Is this financially viable? Who bears risk? What does the trajectory of costs look like?

Pillar 3: Technology

Focus: Health IT infrastructure, data architecture, interoperability, digital health tools **Tools Used:** Technology assessment, FHIR readiness review, AI governance framework, EHR optimization analysis **Questions Answered:** Does the technology support the strategy? Where are the data gaps? What is the build/buy decision?

Pillar 4: Clinical

Focus: Care quality, clinical outcomes, evidence base, provider engagement **Tools Used:** HEDIS/Star analysis, quality program design, clinical guideline integration, care management ROI **Questions Answered:** Is care high-quality? What clinical interventions have evidence? How do we engage providers?

Pillar 5: Equity

Focus: Health disparities, social determinants, access, community-centeredness **Tools Used:** Disparity analysis, SDOH composite scoring, equity-weighted ICER, geographic access gap mapping **Questions Answered:** Who is being left behind? What structural barriers exist? How do we close disparity gaps?

Applying the Framework

Every major deliverable includes a Five-Pillar summary table:

- Status assessment for each pillar (Green/Yellow/Red)
 - Key finding per pillar (1–2 sentences)
 - Priority recommendation per pillar
 - Cross-pillar interdependencies highlighted
-

11. Key Performance Indicators

Operational KPIs (displayed on advisory landing page via **ADVISORY_STATS**):

Metric	Value	Description
Engagements Completed	200+	Advisory projects delivered since inception
States Served	35+	Distinct state health system contexts
Client Satisfaction	97%	Net Promoter Score equivalent
Avg. ROI Delivered	4.2x	Client-reported return on advisory investment
Policy Briefs Published	150+	Original research and policy analysis documents
Years of Experience	15+	Combined leadership team experience in health transformation
Expert Network	50+	Network of credentialed advisors and subject matter experts
Technology Assessments	75+	Health IT systems evaluated

Client Outcome Metrics (tracked per engagement):

- TCOC reduction (% and absolute dollars)
 - HEDIS measure improvement (percentile movement)
 - Star Rating improvement (stars gained)
 - Risk-adjusted revenue optimization (RAF score improvement)
 - Regulatory compliance gap closure (# findings resolved)
 - Time-to-implementation for strategic recommendations
-

12. User Journey Maps

Journey 1: Health System CEO — Strategic Planning

Entry Point: Google search for "health system transformation consulting Vermont" **Path:**

1. Lands on **/advisory** — reads overview, notes Five-Pillar approach
2. Navigates to **/advisory/consulting** — reviews strategic consulting offerings
3. Visits **/advisory-hub** → Tab 4 (Case Studies) — finds relevant health system case
4. Visits **/advisory/approach** — reviews methodology, builds confidence
5. Goes to **/advisory/contact** — fills out intake form (Organization: Health System, Budget: \$500K+, Urgency: Planning)
6. Receives auto-response within 2 minutes
7. Practice lead calls within 24 hours
8. Discovery call scheduled → proposal generated → engagement begins

Time-to-contact: Typically 20–40 minutes from first page view

Journey 2: State Medicaid Director — Policy Analysis

Entry Point: Direct referral from colleague at another state agency **Path:**

1. Lands directly on **/advisory/research** via shared link
 2. Reviews research capabilities and policy brief examples
 3. Visits **/advisory/regulatory** — looks for 1115 waiver experience
 4. Downloads sample policy brief from Advisory Hub Tab 5
 5. Calls main number directly (bypasses online form)
 6. Scheduled for expert call within 48 hours
-

Journey 3: Health Plan VP of Quality — HEDIS Improvement

Entry Point: Sees HTR presentation at AHIP conference **Path:**

1. Visits [/advisory-hub](#) directly (URL from conference materials)
 2. Explores Tab 2 (Services) — identifies Independent Review + Quality Optimization
 3. Uses "Find My Service" diagnostic → recommended: Independent Quality Review + Strategic Consulting
 4. Visits [/advisory/independent-review](#) and [/advisory/consulting](#)
 5. Returns to Advisory Hub Tab 8 (Pricing) — reviews Strategic Partnership tier
 6. Submits contact form with Training added to service interest
 7. Receives proposal for combined engagement within 5 business days
