

The Structural Pillars of System Transformation

NotebookLM

The Architecture of Interdependency

From	Policy	Technology	Economics	Clinical	Equity	Operations
Policy			Enables mandatory authority. →		Enables accountability mandates. →	Requires statutory deadlines.
Technology			Enables VBC financial management. →	Enables risk stratification. →	Enables demographic stratification. →	
Economics		Requires data infrastructure. →		Drives financial rationality. →	Requires social risk adjustment. →	
Clinical					Enables access expansion. →	Requires execution infrastructure.
Equity	Constrains with justice reviews. →			Constrains with cultural competency. →		
Operations	Enables data feedback loops. →	Requires workforce to run → infrastructure.
