

HTR Platform — Training Materials Index

Health Transformation Review | Created May 2026

What's Here

This directory contains all user training materials for the HTR platform, organized into four categories:

- 1. **User Guides** — role-specific quick-start guides (Markdown)
- 2. **Feature Guides** — deep-dive reference sheets per major feature (Markdown)
- 3. **Video Scripts** — production-ready scripts for Loom, Synthesia, HeyGen, or Camtasia
- 4. **In-App Training** — code built directly into the platform

User Guides — By Role

Located in: `training/user-guides/`

File	Role	Key Sections
<code>quick-start-executive.md</code>	Hospital / Health System Executive	HTR Simulator, 50-State Dashboard, Financial Stress Test, AI Analyst
<code>quick-start-policy-analyst.md</code>	Policy Analyst / Government Official	Policy hub, Policy Simulator, Vermont programs, State comparison
<code>quick-start-clinician.md</code>	Clinician (MD, NP, PA)	Clinical hub, Health Equity Studio, Population Health Modeler, Academy
<code>quick-start-economist.md</code>	Health Economist / Actuary	APM Design Lab, CEA Calculator, Actuarial Lab, Global Budget Modeler
<code>quick-start-health-tech.md</code>	Health Tech Professional	FHIR Lab, AI Governance Lab, Digital Health Lab, Developer Hub
<code>quick-start-compliance.md</code>	Medicaid / Compliance Officer	Vermont Medicaid, Eligibility Simulator, Work Requirements Calculator, Act 167/68
<code>quick-start-researcher.md</code>	Student / Researcher	Evidence Library, Six-Pillar Framework, Case Studies, Policy Simulator
<code>quick-start-investor-consultant.md</code>	Investor / Consultant	Investment Tracker, Market analysis, APM financials, Advisory Hub

Each guide includes:

- Role context and what HTR offers this user
- Top 5 destinations with direct URLs
- 3 key workflows with step-by-step instructions
- Research Lab tool reference table
- Keyboard shortcuts and getting help

Feature Guides

Located in: `training/feature-guides/`

File	Feature	Contents
<code>ai-analyst-guide.md</code>	AI Analyst	Access modes, what to ask, role personalization, tips, voice mode, shortcuts
<code>research-lab-guide.md</code>	Research Lab	All 21 tools with descriptions, standalone tools, usage tips

File	Feature	Contents
voice-guide.md	Voice Interface	Browser support, activation, commands, TTS, troubleshooting
academy-guide.md	HTR Academy	All 8 sections, progress tracking, access levels

Video Scripts

Located in: training/video-scripts/

File	Video	Duration	Priority
script-01-platform-overview.md	Platform Overview	3–4 min	High — general audience
script-02-ai-analyst-deep-dive.md	AI Analyst Deep Dive	4–5 min	High — all subscribers
script-03-research-lab-walkthrough.md	Research Lab Walkthrough	5–6 min	Medium — power users
script-04-getting-started-first-5-minutes.md	Getting Started (First 5 Min)	2 min	Highest — onboarding email

Recording Recommendations

For Loom (fastest):

- 1. Open the script
- 2. Set up screen recording
- 3. Navigate the platform following the script prompts
- 4. Record once — Loom auto-trims silence

For Synthesia / HeyGen (professional avatar):

- 1. Copy the NARRATOR text from the script
- 2. Paste into Synthesia as the teleprompter
- 3. Select an avatar and voice
- 4. Upload any screen recordings as B-roll

For ElevenLabs (audio-only / podcast format):

- 1. Copy NARRATOR text
- 2. Paste into ElevenLabs text-to-speech
- 3. Select voice (recommend: "Rachel" or "Adam" for professional tone)
- 4. Export MP3 — embed in Academy webinar or email

In-App Training (Code)

These are built directly into the platform frontend.

Component / Page	Location	What It Does
OnboardingModal.tsx	frontend/components/	Existing — role and pillar selection on first visit
PlatformTour.tsx	frontend/components/	New — 6-step tooltip tour after onboarding is complete
ClientOnlyShell.tsx	frontend/components/	Updated — now mounts OnboardingModal + PlatformTour

Component / Page	Location	What It Does
/academy/getting-started	frontend/app/academy/getting-started/page.tsx	New — full Getting Started hub in the Academy
/academy/getting-started/research-lab	frontend/app/academy/getting-started/research-lab/page.tsx	New — per-tool guide for all 21 Research Lab tools
LabPageShell.tsx	frontend/components/research/	Updated — "How to use this lab" badge on every Research Lab page
LabHelpBadge.tsx	frontend/components/	New — reusable help badge for any tool

Recommended Training Path for New Users

Self-Service (User-led)

1. Land on /welcome → set role (10 seconds)
2. OnboardingModal appears → complete 4-step onboarding (2 minutes)
3. PlatformTour triggers → 6-step tooltip tour (2 minutes)
4. AI Analyst guides first session
5. User finds /academy/getting-started and reads their role guide (10–15 minutes)
6. User watches the 2-minute "First 5 Minutes" video (if available)

Instructor-Led (Team Training)

1. Share the role-specific quick-start guide with each team member
2. Run a 30-minute live demo using Script 01 (Platform Overview) as the outline
3. Assign the Research Lab walkthrough video for async viewing
4. Set a "first question" homework: each person asks the AI Analyst a real work question
5. Follow-up session: debrief on what people found, answer questions

Admin-Managed Onboarding

1. Welcome email → embed Script 04 video ("First 5 Minutes")
2. Link to /academy/getting-started and the user's role-specific guide
3. Set up policy alerts for each new user's area of interest
4. Schedule first Office Hours session (/connect/register-office-hours)

External Tool Recommendations

Format	Tool	Use Case
Screen recording	Loom	Fastest — record using these scripts
Avatar video	Synthesia or HeyGen	Professional avatar + voiceover from scripts
Audio narration	ElevenLabs	High-quality TTS from script text
Interactive eLearning	Articulate Rise	SCORM modules from guide content
Knowledge base	GitBook or Notion	Host rendered versions of these guides
Subtitles	Descript	Auto-captions for accessibility

Updating These Materials

- **When platform features change:** Update the relevant feature guide and any affected role guides
- **When new tools are added to Research Lab:** Update research-lab-guide.md, the Research Lab getting-started page, and the affected role guides

- **When new roles are added:** Copy a role guide template and customize
- **Video re-recording trigger:** Script-to-UI mismatch (UI changed since recording) or major new feature

All training materials are plain Markdown — convert to PDF, HTML, or SCORM as needed.
