

TRANSFORMING AMERICAN HEALTHCARE

A Field Guide to the Six Pillars of System Change

Health Transformation Review — First Edition, April 2026

This master file assembles the complete book from its five parts plus references and index. Individual section files are in this same /docs directory:

- [HTR-Book-Part1.md](#) — Preface + Part I (Chapters 1–3)
- [HTR-Book-Part2.md](#) — Part II: The Six Pillars (Chapters 4–9)
- [HTR-Book-Part3.md](#) — Part III: The Vermont Laboratory (Chapters 10–12)
- [HTR-Book-Part4.md](#) — Part IV: Tools for Transformation (Chapters 13–15)
- [HTR-Book-Part5.md](#) — Part V: The Path Forward (Chapters 16–17) + Afterword
- [HTR-Book-References-Index.md](#) — References by Chapter + Comprehensive Index

COMPLETE TABLE OF CONTENTS

Front Matter

- Cover Page and Title
- About This Book
- A Note on the Vermont Case Study

PART I: UNDERSTANDING THE SYSTEM

Chapter 1 — The American Healthcare Crisis: A Structural Problem

- The Numbers That Demand Explanation
- What "Structural" Actually Means
- Fee-for-service payment · Fragmented delivery · Inadequate SDOH investment · Inequitable access
- The Cost of the Structure
- The Transformation Imperative
- The Scale of Change Required
- Key Concepts: Fee-for-service, APM, SDOH, Healthcare transformation

Chapter 2 — The Six-Pillar Framework: A New Map for Complex Territory

- Why Single-Lens Analysis Fails
- The Six-Pillar Framework: An Introduction
- Pillar 1: Policy — The Rules That Govern Everything
- Pillar 2: Economics — Following the Money
- Pillar 3: Technology — Digital Infrastructure
- Pillar 4: Clinical — Where Transformation Meets the Patient
- Pillar 5: Equity — The Cross-Cutting Imperative
- Pillar 6: Operations — The Execution Test
- How the Pillars Interact: Vermont AHEAD Model
- The Framework in Practice: Three Decision Types
- Key Concepts: Six-Pillar Framework, VBC, ACO, FHIR, HEDIS, HEROI

Chapter 3 — Measuring Transformation: The Health Transformation Index

- The Need for a Composite Measure
- HTI Score Interpretation
- The Architecture of the HTI
- Pillar Weights: The Rationale

- The Composite Formula
 - Data Sources: Where the Numbers Come From
 - The National HTI: Quarterly Trajectory
 - The State Performance Index
 - What the HTI Is Not
 - Trend Analysis: Accelerating, Stable, Stalled Dimensions
 - Key Concepts: HTI, APM Penetration Rate, State Innovation Activity, PQI
-

PART II: THE SIX PILLARS

Chapter 4 — Policy: The Rules That Govern Everything

- Why Policy Comes First
- The Federal Legislative Architecture
- The ACA's Structural Architecture
- CMMI: The Federal Laboratory for Payment Reform
- Medicare Payment Rules: The Annual Rulemaking Cycle
- State Policy: The 50-State Laboratory
- Section 1115, 1115A, and 1332 Waivers
- Prior Authorization: The Operational Policy Failure
- The ACA's Unfinished Business
- Policy Analysis Tools: The HTR Policy Simulator
- Vermont as Policy Case Study
- Key Concepts: ACA, CMMI, 1115 waiver, PA, DRG, IPPS, MLR

Chapter 5 — Economics: Following the Money Through Healthcare

- The Central Thesis of Health Economics
- The Anatomy of U.S. Healthcare Spending
- Value-Based Care: The Economic Framework
- The VBC Spectrum (P4P → Bundled → Shared Savings → Global Capitation)
- The MSSP Financial Model: A Deep Dive
- Hospital Financial Economics
- Actuarial Science: The Mathematics of Insurance Risk
- Cost-Effectiveness Analysis: Quantifying Value
- The Economics of Private Equity
- Key Concepts: VBC, MSSP, ACO REACH, AV, ICER, QALY, Adverse selection, HCC

Chapter 6 — Technology: Digital Infrastructure for the New Healthcare

- The Technology Paradox
- FHIR: The Standard That Is Transforming Healthcare Data Exchange
- The 21st Century Cures Act and FHIR Mandates
- EHR Systems: The Current Landscape
- Artificial Intelligence in Healthcare: Promises and Perils
- Algorithmic Bias: The Equity Risk in Healthcare AI
- Telehealth: Policy, Technology, and Equity
- The FHIR Lab: Building and Validating FHIR Resources
- Key Concepts: FHIR, 21st Century Cures, Patient Access API, CDS Hooks, HCC v28, Algorithmic bias

Chapter 7 — Clinical: Where Transformation Meets the Patient

- The Purpose of the Clinical Pillar
- Care Delivery Model Redesign: PCMH, ACO, Integrated BH
- Clinical Quality Measurement: HEDIS, CMS Stars, MIPS
- Risk Stratification: Identifying Who Needs What Care
- Workforce: The Human Constraint on Transformation
- Preventable Hospitalizations: The Clinical Measure of System Failure
- Key Concepts: PCMH, HEDIS, HCC, RAF, PQI, CoCM, MIPS

Chapter 8 — Health Equity: The Cross-Cutting Imperative

- Why Equity Is a Pillar, Not an Afterthought
- The Anatomy of Health Disparities
- Social Determinants of Health: The Upstream Architecture
- The HEROI Metric: Equity-Weighted Cost-Effectiveness
- Measuring Health Equity: From Aspirations to Metrics
- Vermont's Equity Profile: A Case Study in Non-Racial Disparities
- The Health Equity Studio: Analytical Tools for Equity Work
- Key Concepts: SDOH, HEROI, PQI, NCQA HEA, CMS HEI, Racial disparity index

Chapter 9 — Operations: The Execution Test Every Reform Must Pass

- The \$1 Trillion Administrative Floor
 - Revenue Cycle Management: The Financial Nervous System
 - Prior Authorization Operations: Where Policy Meets Process
 - Workforce Operations: Credentialing, Onboarding, and Retention
 - Supply Chain in the Transformation Context
 - The Administrative Overhead Paradox
 - The Revenue Cycle Friction Index
 - Building Operational Readiness for VBC: A Checklist
 - Key Concepts: RCM, Clean claim rate, Days in AR, RAF coding gap, Gold-carding, Credentialing cycle time
-

PART III: THE VERMONT LABORATORY

Chapter 10 — Vermont's Healthcare Crisis and the Act 167 Mandate

- A State Under Structural Stress (Five Dimensions)
- Green Mountain Care: The Road Not Taken
- Act 167: The Legislative Response to Crisis
- The Oliver Wyman Report: Diagnosis and Prescription
- Vermont's HTI Performance: A Paradox Explained
- The Reference-Based Pricing Debate
- Key Concepts: Green Mountain Care, Act 167, Oliver Wyman Report, RBP, REH, VHCURES

Chapter 11 — The AHEAD Model: America's Most Ambitious Global Budget

- What Is the AHEAD Model?
- Global Budget Mechanics: How the Math Works
- What AHEAD Gets Right
- What AHEAD Gets Wrong: HTR's Critical Assessment
 - Problem 1: Benchmark methodology preserves historical inefficiency
 - Problem 2: Medicare FFS exclusion
 - Problem 3: Insufficient accountability architecture
 - Problem 4: Underspecified equity measurement
- The Global Budget Simulation: Using HTR's Policy Simulator
- The AHEAD Model and Vermont Hospitals: Financial Implications
- VHCURES: The Data Infrastructure AHEAD Depends On
- Key Concepts: AHEAD, 1115A waiver, Global budget benchmark, GMCB, REH, CMMI

Chapter 12 — Vermont's Transformation Architecture: All Six Pillars in Action

- The Six-Pillar Map of Vermont's Transformation
- Pillar 1: Policy — Vermont's Policy Architecture
- Pillar 2: Economics — Vermont's Financial Architecture
- Pillar 3: Technology — Vermont's Digital Infrastructure
- Pillar 4: Clinical — Vermont's Care Delivery Architecture
- Pillar 5: Equity — Vermont's Equity Architecture
- Pillar 6: Operations — Vermont's Execution Architecture
- The Six-Pillar Interdependency Map for Vermont

- Vermont's HTI Trajectory: 2026–2030 Scenarios (A, B, C)
- Key Concepts: GMCB, DVHA, AHC model, CoCM, CHW, APCD

PART IV: TOOLS FOR TRANSFORMATION

Chapter 13 — Interactive Analytics: The Research Lab's 19 Tools

Section 1: Interoperability & Risk

- Tool 1: FHIR Interoperability Lab
- Tool 2: Risk Stratification Engine

Section 2: Payment Models & VBC

- Tool 3: APM Design Lab
- Tool 4: APM Shared Savings Calculator
- Tool 5: Cost-Effectiveness Analysis Calculator

Section 3: Population & Equity

- Tool 6: Population Health Modeler
- Tool 7: Health Equity Studio

Section 4: Policy & Quality Sciences

- Tool 8: Policy Simulator
- Tool 9: Clinical Quality Optimizer
- Tool 10: Hospital Financial Scorecard
- Tool 11: HTA Studio
- Tool 12: Actuarial Lab

Section 5: Technology & AI

- Tool 13: AI Analytics Lab
- Tool 14: Digital Health Lab

Section 6: Knowledge & Workspace

- Tool 15: Evidence Library
- Tool 16: Workforce Modeler
- Tool 17: Innovation Leaderboard
- Tool 18: Research Workspace

Key Concepts: Markov model, EVPI, MCDA, RPM, AUC-ROC, Gold-carding

Chapter 14 — Learning for Transformation: The HTR Academy

- Why Learning Infrastructure Matters
- The Academy Content Architecture
- The Six Learning Tracks (Policy, Economics, Clinical, Technology, Equity, Operations)
- Case Studies: Learning from Real-World Implementation
 - Sample: Vermont FQHC Behavioral Health Integration
- The Glossary: 200+ Terms
- Personalized Learning: AI-Generated Curricula
- Key Concepts: HEDIS denominator, BHCM, CoCM, Personalized learning

Chapter 15 — AI and Healthcare Intelligence: The RAG-Powered Analyst

- The Problem AI Solves in Healthcare Intelligence
- RAG Architecture: How the System Works
- The Knowledge Base: What the AI Knows
- The Medicaid Eligibility Subsystem
- Role-Based Intelligence

- The AI Analyst's Limitations
- Key Concepts: RAG, Vector embedding, pgvector, BM25, RRF, Cross-encoder reranking, LLM routing

PART V: THE PATH FORWARD	
Chapter 16 — Advisory Infrastructure: From Analysis to Action	
• The Gap Between Knowing and Doing • The Five Advisory Service Lines 1. Policy Strategy 2. Value-Based Care Transformation (VBC Readiness Assessment) 3. Health Technology Assessment (Evidence Dossier) 4. Clinical Quality and Safety (HEDIS Improvement Methodology) 5. Health Equity Strategy (Equity Assessment Methodology) • The Engagement Model: Phases 1–4 • Implementation Toolkits • Advisory Pricing • Office Hours • Key Concepts: Evidence dossier, VBC Transformation Readiness, Office Hours, Toolkit, Scope memo	
Chapter 17 — The Future of Healthcare Transformation: 2026 and Beyond	
• Where the System Is Today • Five Forces Shaping the Next Decade 1. The AI Transformation of Clinical Practice 2. The Demographic Reckoning 3. The Consolidation of Health Systems 4. The Drug Pricing Reckoning 5. The Policy Pendulum • The Six-Pillar Forecast: 2026–2035 • Vermont's 10-Year Trajectory: The National Preview • A Closing Framework: The Decisions That Will Determine Outcomes • Key Concepts: Ambient clinical intelligence, GLP-1 agonists, PACE, MCP, IDN	
Afterword: The Platform Behind the Book	
BACK MATTER	
References by Chapter (115 citations)	
• Preface & Chapter 1 • Chapter 2 • Chapter 3 • Chapters 4–9 (by pillar) • Chapters 10–12 (Vermont) • Chapters 13–15 (Tools, Academy, AI) • Chapters 16–17 (Advisory, Future)	
Comprehensive Index (A–Z, 200+ entries with chapter cross-references)	
About Health Transformation Review	
Acknowledgments	
BOOK STATISTICS	
Component	Content

Component	Content
Total parts	5
Total chapters	17
Total sections	~200+
Defined concepts	100+
Vermont case studies	15+
Research tool descriptions	19
Learning tracks	6
References	115
Index entries	200+
Estimated print pages	350–420
