Matthew Rockwell

Administrative Services Director

Agency of Human Services

State of Vermont

Email: matthew.rockwell@vermont.gov

Dear Mr. Rockwell,

Vitosha Inc. is pleased to submit this proposal in response to the State of Vermont Agency of Human Services' Request for Proposal for *Hospital Transformation Analytical Support*. With over six years of experience supporting state health departments and major healthcare organizations nationwide, Vitosha offers advanced data analytics, visualization, and transformation expertise to help Vermont achieve its health system reform goals.

Our team of data scientists, healthcare analysts, and project managers bring a proven track record of delivering analytics-driven insights for public health initiatives, including predictive modeling, cost-of-care benchmarking, and performance dashboards.

We understand the importance of this initiative in guiding hospital transformation, ensuring access, affordability, and sustainability across Vermont's health system. Vitosha's proposed solution aligns with the Agency's objectives and complies with all RFP requirements.

This response follows the State's required content & format (Section 4). All appendices called out below are included as attachments. No unsolicited confidential bidder information is included.

We appreciate the opportunity to partner with the State of Vermont and look forward to supporting this critical effort.

Sincerely,

Mousmi Shah Gandhi

General Manager, Vitosha Inc.

proposals@vitoshainc.com | +1 (845) 332-6268

1. TECHNICAL RESPONSE

1.1 Form of Business Organization, Company Size & Resources (RFP § 4.7.1)

Legal Form: Vitosha Inc. is a **C-Corporation** registered in the Commonwealth of Pennsylvania.

Date of Incorporation: February 15, 2019

Registered Address: 1020 W 8th Avenue, Suite 2AA, King of Prussia, PA 19406

Primary POC: Mousmi Shah Gandhi | General Manager | proposals@vitoshainc.com | +1 (845) 332-6268

Number of Employees: 145+ full-time staff (onshore and offshore). All project delivery resources for this engagement will be U.S.-based.

Corporate Overview

Vitosha Inc. is a data and technology consulting firm specializing in **cloud analytics, healthcare modernization, and AI-driven decision support** for public-sector, healthcare, and financial institutions. We enable state and local governments to transform complex data environments into actionable intelligence that drives efficiency, transparency, and improved outcomes.

Our delivery organization combines deep expertise in **data science, health economics, and policy analytics** with robust **cloud engineering and compliance capabilities**. Vitosha's internal delivery framework integrates program management, security, and data operations under a unified Azure DevOps environment to ensure rapid, high-quality execution.

Core Delivery Resources

- **Azure Cloud Engineering & Data Infrastructure Team:** Certified Azure Architects and DevOps Engineers responsible for data pipelines, governance, and secure cloud hosting.
- **Healthcare Data Engineering & Analytics Group:** Specialists in claims data, hospital cost structures, and All-Payer Claims Database (APCD) integration.
- **Data Science & Machine Learning Practice:** Advanced modeling experts experienced in cost, quality, and access analytics.
- **BI & Visualization Specialists:** Certified Power BI and Tableau developers creating interactive dashboards for policymakers and the public.
- **Security & Compliance Leadership:** Dedicated resources ensuring full compliance with **HIPAA, HITECH, and SOC 2** standards.
- **Project Management Office (PMO):** PMP-certified managers skilled in state-level contract administration, stakeholder management, and milestone delivery.

Vitosha operates under **SOC 2– and ISO-aligned operational practices**, with automated **CI/CD pipelines** built on **Azure DevOps**. Our infrastructure is optimized for large-scale healthcare datasets and fully meets or exceeds **State of Vermont cybersecurity and interoperability standards**.

1.2 Capabilities & Experience Relevant to the RFP (RFP § 4.7.2)

Alignment with Vermont’s Objectives

Vitosha’s technical capabilities directly support Vermont’s **Hospital Transformation Analytical Support** initiative — providing scalable analytics, transparent public reporting, and actionable modeling to inform healthcare policy, access, and financial sustainability.

Core Technical Capabilities

- **Rapid Data Ingestion & Harmonization:** Automated ingestion of claims, cost, and clinical datasets, including **Medicare Cost Reports, HCRIS, and CMS Quality Metrics**.
- **Azure-Native Analytics Platform:** End-to-end solution built on **Azure Data Factory, Data Lake Gen2, Synapse, Databricks, and Power BI Premium**, supporting scalable, secure data processing.
- **Geospatial & Drive-Time Modeling:** Leveraging **Azure Maps and ArcGIS APIs** to evaluate **cross-border patient flow**, service availability, and access disparities.
- **Cost, Quality & Access Scenario Modeling:** Dynamic what-if simulations of hospital transformation policies, service line realignments, and financial impact projections.
- **Evidence-Based Benchmarking:** Comparative analytics against **CMS, AHRQ, and state peer datasets** to evaluate efficiency, cost of care, and quality performance.
- **Regulatory & Fiscal Compliance:** Deep experience with **HIPAA and 2 C.F.R. §200** requirements for federally funded programs.
- **Public-Facing Transparency:** Delivery of high-quality **Power BI dashboards and executive reports** ready for publication by AHS and the Green Mountain Care Board.

Representative Experience

Vitosha has delivered similar healthcare and public-sector analytical engagements for multiple state governments, large health systems, and national consulting partners.

Selected State and Public-Sector Engagements

- **State of Florida / Deloitte / Florida DOE & DOH:** Built a statewide **health and human services analytics platform** integrating Medicaid and public health data for cost and performance transparency.

- **State of Wisconsin – Department of Revenue:** Developed predictive and fiscal analytics dashboards aligning healthcare expenditure with budget forecasting and grant accountability requirements.
- **State of Texas / Deloitte:** Supported Medicaid transformation initiatives, integrating eligibility, claims, and provider performance data to enable policy scenario modeling.
- **State of Kansas / Inova Solutions:** Created **hospital capacity and accessibility dashboards** to analyze rural and urban care disparities.
- **City of New York:** Designed and deployed **multi-agency data integration systems** connecting healthcare, housing, and emergency response datasets under a unified data governance model.
- **State of Arkansas:** Delivered data harmonization and visualization for healthcare infrastructure planning and reporting.
- **State of Colorado – Department of Education:** Implemented cross-agency data standardization and Power BI reporting environments for education and public service performance monitoring.

These projects reflect the scale, complexity, and inter-agency collaboration required for Vermont’s hospital transformation objectives.

Healthcare & Life Sciences Experience

Vitosha’s healthcare analytics expertise is demonstrated through engagements with major providers, insurers, and health systems:

- **Johnson & Johnson Vision Care Inc. (JJVCI):** Developed advanced clinical data integration and performance dashboards using Azure Synapse.
- **Providence Health & Services:** Delivered predictive models for patient outcomes, access equity, and cost-of-care improvement.
- **Apollo Insurance Solutions Group LLC:** Created cost and claims analytics dashboards improving accuracy in reimbursement and fraud detection.
- **U.S. Renal Care (USRC):** Designed Power BI dashboards consolidating EHR and operational data to improve care delivery and compliance reporting.
- **Natividad:** Conducted capacity and quality modeling to inform strategic hospital investments.

These healthcare transformation experiences mirror the **analytic, operational, and compliance frameworks** envisioned for the State of Vermont.

Value to the State of Vermont

By applying these proven methods, Vitosha will deliver an analytical framework that:

- Reduces manual data reconciliation time by **40–60%** through automation and validation pipelines.
- Produces **ready-to-present dashboards** for both policymakers and the public.
- Supports **scenario modeling** for cost, access, and equity analysis.
- Promotes transparency and collaboration across agencies through centralized, reproducible analytics.

Our integrated approach ensures that Vermont’s hospital transformation goals are supported with **data integrity, interpretability, and actionable insight**.

1.3 Experience Working with the State of Vermont (RFP § 4.7.3)

While Vitosha has not yet directly performed work for the **State of Vermont**, our extensive track record with comparable state health agencies positions us uniquely to deliver immediate value. Our prior engagements demonstrate a deep understanding of the operational, fiscal, and analytical frameworks common to state healthcare systems.

We have successfully supported transformation and analytics initiatives for:

- **State of Florida / Deloitte** – Human Services and Medicaid analytics modernization.
- **State of Wisconsin – Department of Revenue** – Fiscal analytics for healthcare expenditure tracking.
- **State of Texas – Deloitte** – Multi-agency healthcare cost transparency programs.
- **State of Kansas / Inova Solutions** – Hospital and regional access modeling.
- **State of Arkansas** – Health infrastructure reporting and public data transparency projects.
- **State of Colorado – Department of Education** – Cross-agency analytics governance for public programs.

Our exposure to these environments ensures full familiarity with **state procurement processes, interagency coordination models, public transparency expectations, and compliance with federal funding regulations**.

By leveraging this experience, Vitosha will bring a tested, scalable, and collaborative approach to Vermont’s hospital transformation initiative—delivering **trusted analytics, timely reporting, and insightful policy support** aligned with AHS and Green Mountain Care Board objectives.

1.4 Subcontractors (RFP § 4.7.4)

Vitosha Inc. does **not intend to engage any subcontractors** for this project. All services proposed under the **Hospital Transformation Analytical Support** engagement will be performed **entirely in-house** by Vitosha’s dedicated delivery teams located within the United States.

Our internal organization encompasses all technical, analytical, and management disciplines required to meet or exceed the RFP scope, including:

- **Healthcare Data Integration and Analytics** — handled by Vitosha’s in-house Healthcare Data Engineering & Analytics Group, experienced in Medicaid and hospital cost data systems.
- **Cloud Infrastructure and Security** — delivered through our certified **Azure Cloud Engineering Team**, ensuring compliance with HIPAA, HITECH, and State of Vermont cybersecurity policies.
- **Geospatial and Policy Modeling** — managed by our **Data Science & Machine Learning Practice**, which includes expertise in ArcGIS and Azure Maps for regional access and equity analytics.
- **Visualization and Reporting** — executed by Vitosha’s **BI & Power BI Development Unit**, specializing in public-facing dashboards and GNCB-compliant reporting formats.
- **Project Management and Oversight** — led by our **PMP-certified Program Management Office (PMO)**, responsible for governance, stakeholder coordination, and contract deliverables.

This **self-contained delivery model** eliminates third-party dependencies, reduces coordination risks, and ensures **faster turnaround times, uniform quality control, and complete accountability** for all deliverables under the contract.

Should specific specialized expertise or Vermont-based domain consultation be required during execution, Vitosha will coordinate with the State for approval prior to onboarding any third-party resources. At present, however, **Vitosha confirms full internal capacity to perform the entire scope without subcontracting.**

This part of the page is left blank intentionally.

2. TECHNICAL APPROACH

Vitosha Inc. will implement a structured and data-driven approach that integrates proven technical frameworks, industry best practices, and cloud-native architectures to deliver a secure, scalable, and analytics-ready solution. Our technical design emphasizes automation, transparency, and interoperability—enabling the State to make data-informed decisions through an integrated ecosystem of high-quality datasets, geospatial intelligence, financial analytics, and evidence-based benchmarking.

Our approach maps directly to the scope of services and evaluation criteria, ensuring all functional and analytical deliverables are met within the defined implementation window.

2.1 Data Integration & Analysis Plan

Vitosha will establish a secure, automated, and repeatable data ingestion and integration framework that ensures high-quality, de-identified datasets are readily available for analytics and visualization.

Key Activities:

- **Secure Data Ingestion:** Utilize **Azure Data Factory (ADF)** with **SFTP Secure Connectors** to ingest de-identified extracts from state systems and external data sources. Access controls and role-based permissions will be implemented to maintain strict compliance with data security requirements.
- **Data Lake Architecture:** Ingested data will be processed within a **multi-zone data lake (Bronze–Silver–Gold architecture)** hosted on **Azure Data Lake Gen2**:
 - **Bronze Layer:** Raw, immutable state extracts retained for audit traceability.
 - **Silver Layer:** Cleansed and standardized data enriched with metadata and code mappings.
 - **Gold Layer:** Analytics-ready datasets optimized for Power BI, machine learning models, and geospatial processing.
- **Data Quality Automation:** Using **Azure Databricks**, automated scripts will validate data structure, detect anomalies, and confirm de-identification integrity. Automated profiling reports will capture completeness, accuracy, and consistency metrics.
- **Documentation & Reporting:** A comprehensive **Data Integration & Analysis Plan** will define the ingestion workflows, schema mapping, and transformation logic. **Data Dictionary** and **Quality Dashboard** will enable transparency for all users.

Deliverables:

- Validated Data Integration and Analysis Plan
- Master Data Dictionary
- Automated Data Quality Dashboard

Timeline: Weeks 4–6

2.2 Hospital & Regional Access Modeling

To evaluate hospital and regional service coverage, Vitosha will implement a **geospatial access modeling framework** integrating travel-time analytics, seasonal variations, and cross-state access patterns.

Key Activities:

- **Geospatial Engine:** Use **Azure Maps** and **Azure Synapse geospatial functions** to compute **drive-time isochrones** for each facility and model travel accessibility across different population segments.
- **Traffic and Seasonality Factors:** Incorporate seasonal travel data and public road network variables to adjust for winter accessibility, rural route constraints, and border crossings (NY/MA/NH).
- **Service Coverage Analysis:** Generate **coverage maps, access gap analyses, and hospital service overlap regions**, highlighting underserved areas and potential regionalization candidates.
- **Integration with Demographic Data:** Combine census and claims datasets to visualize how socio-economic factors and patient distribution affect healthcare accessibility.

Deliverables:

- Comprehensive Access Modeling Report
- Interactive Geospatial Dashboards in Power BI

Timeline: Weeks 5–12

2.3 Market & Financial Analysis

Vitosha will deliver a comprehensive financial and operational model integrating cost, claims, and hospital data to identify opportunities for efficiency, sustainability, and transformation readiness.

Key Activities:

- **Data Consolidation:** Merge hospital cost reports, Medicare claims, and staffing data to create a unified view of facility-level performance.
- **Service-Line Costing:** Apply **Total Cost of Care (TCOC)** frameworks to determine margins and break-even points by specialty and service type.
- **Operational Efficiency Models:** Evaluate historical utilization and staffing ratios to estimate **FTE optimization scenarios** under alternative transformation pathways (e.g., consolidation, hospital-at-home programs).

- **Scenario-Based Cost Forecasting:** Use predictive models to forecast financial sustainability across different transformation strategies.

Deliverables:

- Financial and Market Analysis Reports
- Facility and Regional Performance Scorecards

Timeline: Weeks 7–12

2.4 Evidence-Based Benchmarking

Vitosha will benchmark Vermont hospital and regional performance against national and regional comparators using **standardized, evidence-based quality measures**.

Key Activities:

- **Benchmark Data Sources:** Integrate datasets such as **CMS Hospital Compare, Leapfrog, PSI-90, ACSC, and National Healthcare Safety Network (NHSN)** indicators.
- **Comparator Selection:** Identify peer facilities by population served, case mix, and rurality index to ensure meaningful comparison.
- **Analytical Framework:** Compute performance gaps, efficiency indices, and improvement thresholds using statistical normalization and percentile-based scoring.
- **Transparency and Documentation:** Clearly outline methodology, metric definitions, and data sources to ensure repeatability and auditability.

Deliverables:

- Evidence-Based Benchmarking Methodology Document
- Benchmark Comparison Reports and Interactive Dashboards

Timeline: Weeks 8–13

2.5 Transformation Scenario Modeling

Vitosha will build a **Transformation Scenario Modeling Suite**, enabling stakeholders to visualize and quantify the potential impacts of policy and operational reforms.

Key Activities:

- **Model Design:** Combine **machine learning (predictive modeling)** with **deterministic scenario simulation** to assess outcomes of various strategic interventions.
- **Scenarios Modeled:**
 - Hospital service-line consolidation and role redefinition
 - Expansion of telemedicine and hospital-at-home programs

- Workforce redistribution and FTE rebalancing
- EMS triage redesign and emergency department load balancing
- Interoperability and data-sharing enhancement across regional networks
- **Sensitivity and Impact Analysis:** Quantify cost, quality, and access outcomes under each modeled scenario with confidence intervals and visual summaries.
- **Decision Support Output:** Enable stakeholders to evaluate “what-if” scenarios interactively through Power BI dashboards and visual simulation layers.

Deliverables:

- Transformation Scenario Modeling Suite
- Sensitivity Analysis and Implementation Recommendations

Timeline: Weeks 10–16

2.6 Final Reports & Public-Facing Materials

Upon completion of all analytical and modeling workstreams, Vitosha will consolidate findings, insights, and recommendations into a comprehensive and transparent deliverable set designed for policy, operational, and public communication use.

Key Activities:

- **Integrated Reporting:** Compile all analytical findings—data integration, access modeling, financial projections, and scenario analyses—into a single, cohesive **Regional and Hospital Transformation Analytics Report**.
- **Stakeholder Presentation:** Develop a **professional presentation deck** tailored for GMCB/AHS leadership, summarizing methodology, insights, and policy implications.
- **Public Visualizations:** Prepare a **public-facing Power BI dashboard suite** with embedded narrative text, contextualized assumptions, and clear visualization of confidence intervals to promote transparency and understanding.
- **Knowledge Transfer:** Conduct handoff sessions and documentation workshops with state analysts to ensure ongoing maintenance and adaptability of the system.

Deliverables:

- Final Regional and Hospital Transformation Analytics Report
- Executive Presentation Deck for Stakeholders
- Public-Facing Interactive Dashboards

Solution Architecture

Process Flow Diagram

3. STAFFING, QUALIFICATIONS & RESUMES

Vitosha Inc. brings together a multidisciplinary team of experienced professionals with deep expertise in **healthcare analytics, cloud data engineering, and public-sector program delivery**. Each team member has been carefully selected for their subject-matter expertise, proven track record in similar engagements, and ability to collaborate effectively with state and healthcare stakeholders.

Our staffing model is designed to ensure full-time commitment of core resources throughout the project lifecycle, supported by a structured project management framework and quality assurance process.

The proposed team collectively brings **over 75 years of combined experience** in data modernization, cloud architecture, predictive modeling, and healthcare performance analytics.

3.1 Key Personnel (Summary)

Project Manager — Doonarine Lall (1.0 FTE)

Experience: 12+ years

Role: Project Management, Stakeholder Governance, and Client Liaison

Responsibilities:

- Lead overall project delivery, scope management, and governance in alignment with AHS objectives.
- Serve as the single point of contact for the State, overseeing communications, reporting, and deliverable acceptance.
- Manage project schedule, risk register, issue resolution, and change control.
- Ensure compliance with project standards, timelines, and performance indicators.
Expertise: Microsoft 365 Cloud Solutions, Agile/Waterfall Hybrid Delivery, Federal and State Data Modernization Projects.
- **Notable Experience:** Successfully managed multi-agency modernization initiatives for the States of Florida, Wisconsin, and Texas.

Technical Lead / Solution Architect- Vivek Menon M.

Experience: 12+ years

Role: Solution Architecture, Security Design, and Technical Oversight

Responsibilities:

- Lead architecture design and validation for all Azure-based services, including data ingestion, storage, and analytics pipelines.
- Define technical standards for interoperability, performance, and security.

- Oversee integration of Power BI, Synapse, and Databricks for analytics delivery.
- Ensure all solutions adhere to HIPAA, NIST 800-53, and State of Vermont IT Security Policies.
Expertise: Microsoft Azure, Enterprise Data Lake Architecture, Zero-Trust Security, Data Governance.
- **Notable Experience:** Designed and implemented secure data modernization architectures for healthcare and financial clients across five U.S. states.

Lead Data Engineer (1.0 FTE)

Experience: 8+ years

Role: Data Pipeline Development, ETL Design, and Quality Engineering

Responsibilities:

- Lead the design, development, and optimization of ETL pipelines using Azure Data Factory and Databricks.
- Implement automated data validation and transformation workflows.
- Collaborate with the Technical Lead to ensure scalability and performance of data models.
- Maintain version-controlled, auditable data processes aligned with reproducibility standards.
Expertise: Azure Synapse, PySpark, SQL, Data Quality Frameworks, Metadata Management.
- **Notable Experience:** Developed multi-source data pipelines integrating hospital claims, cost reports, and census data for public health analysis.

Data Engineers (2 positions) — (2.0 FTE total)

Experience: 5–7 years each

Role: Pipeline Development, Transformation Logic, Data Testing

Responsibilities:

- Support ingestion and transformation of structured and semi-structured datasets.
- Implement data integrity validation and support ETL testing.
- Contribute to continuous improvement of performance and error handling routines.
Expertise: Python, SQL, Azure Data Factory, API Integration.
- **Notable Experience:** Supported large-scale data warehouse development for multi-state healthcare benchmarking systems.

Lead Data Scientist (1.0 FTE)

Experience: 7+ years

Role: Predictive Modeling, Scenario Simulation, and Statistical Validation

Responsibilities:

- Develop statistical and machine learning models for transformation scenario analysis.
- Conduct sensitivity testing, model validation, and explainability assessments.
- Translate analytical findings into actionable insights for policy decisions.
- Collaborate with healthcare domain experts to ensure model interpretability and real-world relevance.
- **Expertise:** Python (scikit-learn, XGBoost), Azure ML, Time Series Forecasting, Econometrics.
- **Notable Experience:** Led AI and predictive analytics initiatives for major healthcare organizations, including Providence Health & Services and Apollo Insurance Solutions.

Healthcare Analytics Specialist (1.0 FTE)

Experience: 8+ years

Role: Clinical and Claims Data Analytics, KPI Development, and Benchmarking

Responsibilities:

- Interpret clinical and financial datasets to derive quality and utilization metrics.
- Map hospital data to national standards such as CMS 5-Star and AHRQ PSI indicators.
- Provide subject-matter input for evidence-based benchmarking and reporting.
- Support scenario modeling with clinical context and performance insights.
- **Expertise:** Healthcare Claims Data, DRG/APC Modeling, Quality Reporting, Value-Based Care Metrics.
- **Notable Experience:** Supported CMS quality reporting programs and state hospital transformation analytics.

Business Intelligence (BI) Developer (1.0 FTE)

Experience: 6+ years

Role: Visualization, Dashboard Design, and User Experience

Responsibilities:

- Design and build interactive Power BI dashboards for access, financial, and benchmarking analyses.

- Develop geospatial layers using Azure Maps and ArcGIS integrations.
- Create public-facing visualizations for AHS and GMCB reporting.
- **Expertise:** Power BI, DAX, SQL, ArcGIS, User-Centered Visualization Design.
- **Notable Experience:** Delivered statewide data transparency dashboards for State of Kansas and State of Florida initiatives.

Security & Compliance Specialist (0.5 FTE)

Experience: 10+ years

Role: Data Security, Compliance Oversight, and Risk Management

Responsibilities:

- Ensure all data handling practices comply with HIPAA, HITECH, and State of Vermont Information Security Standards.
- Conduct security audits, vulnerability assessments, and access reviews.
- Collaborate with AHS security officers to align on compliance documentation and reporting.
- **Expertise:** NIST 800-53, ISO 27001, Azure Security Center, Compliance Automation.
- **Notable Experience:** Oversaw compliance frameworks for multiple healthcare and financial clients across state agencies.

Azure Cloud Engineer

Experience: 8+ years

Role: Infrastructure Automation, Monitoring, and Optimization

Responsibilities:

- Deploy and maintain cloud environments for data processing and visualization workloads.
- Implement resource monitoring, backup, and disaster recovery procedures.
- Optimize storage and compute utilization for cost-effectiveness.
- **Expertise:** Azure DevOps, Terraform, ARM Templates, Cloud Cost Optimization.
- **Notable Experience:** Supported production-grade Azure environments for Deloitte's public sector cloud implementations.

3.2 Staffing Availability & Backup Resources

Vitosha maintains a robust **resourcing and continuity framework** to ensure uninterrupted project delivery, even in the event of staff transitions or unforeseen absences.

Staffing Continuity Plan

- **Bench Strength:** Vitosha maintains an internal bench of certified engineers, data scientists, and analysts with relevant domain experience ready for immediate deployment.
- **Cross-Training:** Core personnel are cross-trained across technical and analytical domains to ensure redundancy and rapid transition capability.
- **Partner Network:** As part of our established partnerships with **Deloitte**, **Wipro**, and **Nagarro**, Vitosha has access to additional cleared and qualified personnel who can be mobilized under the same contract structure if needed.
- **Availability Guarantee:** All key personnel are committed for the full duration of the engagement. Any replacement will be pre-approved by the State and accompanied by equal or greater qualifications and experience.
- **Certifications & Clearances:** All staff hold current certifications relevant to their roles (Azure, PMP, Power BI, or Security+) and comply with background check requirements per State policy.

This structured staffing plan ensures **continuity, accountability, and delivery assurance**—with no degradation of service or project momentum.

Summary

Vitosha's team combines:

- **Technical Excellence:** Proven experience in Azure-based data modernization and healthcare analytics.
- **Public Sector Experience:** Extensive delivery experience for state and municipal government clients.
- **Operational Reliability:** Strong resource depth and continuity planning.
- **Collaborative Engagement:** Transparent communication, iterative development, and stakeholder inclusion throughout the project.

With this team composition, Vermont AHS will benefit from a **dedicated, experienced, and responsive partner** capable of executing complex analytical initiatives with precision and transparency.

This part of the page is left blank intentionally.

4. CAPACITY / TIMELINE / DELIVERABILITY

Vitosha Inc. has the organizational depth, technical resources, and proven program management framework necessary to execute the Hospital Transformation Analytical Support engagement with precision, transparency, and measurable impact. Our approach emphasizes disciplined delivery, iterative validation, and active collaboration with the Agency of Human Services (AHS) to ensure alignment with both policy and operational objectives.

We combine domain-specific expertise in healthcare analytics with advanced Azure-based cloud engineering and data science capabilities to provide a fully managed and accountable solution. Our project plan ensures seamless coordination, adherence to data governance standards, and continuous stakeholder engagement at every stage.

4.1 Proposed Team & Full-Time Equivalents (FTEs)

The proposed project team will comprise approximately **10 core full-time equivalent (FTE)** resources during the implementation phase. This team composition has been carefully structured to balance program governance, technical execution, and domain expertise, ensuring timely delivery of milestones while maintaining flexibility to scale during peak workload periods.

Role / Function	Designation	Estimated FTE	Primary Responsibilities
Project Manager	Doonarine Lall	1.0	End-to-end project oversight, governance, scheduling, stakeholder coordination, and risk management.
Technical Lead / Solution Architect	Vivek Menon M	1.0	Technical architecture, cloud infrastructure design, and security compliance (HIPAA, SOC 2).
Lead Data Engineer	Data Engineering Lead	1.0	ETL architecture, data ingestion, transformation logic, and quality assurance framework.
Data Engineers (2)	Data Integration Specialists	2.0	Pipeline development, data harmonization, metadata management, and automation scripting.
Lead Data Scientist	Predictive Modeling Specialist	1.0	Model design, statistical validation, benchmarking, and forecasting.

Healthcare Analytics Specialist	Clinical/Claims Analyst	1.0	Interpretation of clinical and financial datasets, KPI development, and healthcare-specific insights.
BI Developer	Visualization Engineer	1.0	Power BI dashboard creation, geospatial analytics, and user interface optimization.
Security & Compliance Specialist	Information Security Officer	0.5	Compliance oversight, audit readiness, and continuous monitoring of access controls.
Azure Cloud Engineer	DevOps / Infrastructure Engineer	0.5	Cloud environment setup, scaling, performance tuning, and monitoring automation.

Total Estimated Core Delivery Effort: ~10 FTEs (scalable up to 14 FTEs as project phases intensify)

All project personnel will be U.S.-based, operating primarily from **Vitosha's King of Prussia, Pennsylvania** headquarters, ensuring full compliance with state and federal data handling standards.

4.2 Project Timeline & Milestones

The engagement will follow a **structured 16-week implementation plan** with subsequent ongoing support. Each phase is designed to build upon the prior, ensuring operational readiness, data quality assurance, and policy-relevant analytics outcomes.

Phase 1: Foundation & Mobilization (Weeks 1–4)

Objective: Establish the foundational infrastructure, governance protocols, and secure data pathways required for all subsequent project work.

Activities:

- Conduct a **formal project kickoff meeting** with AHS and stakeholder teams to review objectives, success criteria, and communication protocols.
- Finalize the **Business Associate Agreement (BAA)** and all data use and confidentiality agreements.
- Configure **secure Azure Data Lake and Azure Synapse** environments with appropriate identity access controls (RBAC and MFA).
- Establish **SFTP and VPN connectivity** to receive and manage de-identified data from AHS systems.

- Develop a **Data Integration & Analysis Plan**, outlining schema mappings, transformation logic, and compliance considerations.
- Define the **project governance model**, including escalation matrix, reporting cadence, and key performance checkpoints.

Deliverables:

- Validated Azure infrastructure and security framework.
- Approved Data Integration & Analysis Plan.
- Operational connectivity and access verification.
- Project workplan, milestone schedule, and reporting templates.

Outcome:

A fully operational and compliant technical environment with clear governance alignment between Vitosha and AHS.

Phase 2: Data Integration & Quality Framework (Weeks 5–8)

Objective: Implement and validate the data ingestion, quality, and governance mechanisms to ensure accuracy and reliability of analytical datasets.

Activities:

- Build automated **ETL pipelines** using Azure Data Factory, Databricks, and Delta Lake architecture.
- Perform **initial ingestion of historical and current data** from AHS, CMS, and related sources.
- Develop and execute **data validation scripts** to identify anomalies, missing fields, or inconsistent record structures.
- Implement **data lineage and audit trail dashboards**, ensuring full traceability across ingestion and transformation layers.
- Develop **data profiling dashboards** to visually monitor quality metrics such as completeness, timeliness, and consistency.
- Begin harmonization of **clinical, financial, and operational datasets** into a unified analytics-ready schema.

Deliverables:

- Fully operational ETL pipelines.
- Quality dashboards displaying data integrity metrics.
- Validated harmonized datasets ready for analytical modeling.
- Internal QA audit results and stakeholder walkthrough.

Outcome:

A validated and auditable data foundation capable of supporting reliable analytics and scenario modeling.

Phase 3: Analytics Development & Modeling (Weeks 9–12)

Objective: Develop and validate predictive and descriptive analytics to inform hospital transformation strategies.

Activities:

- Develop **baseline performance models** capturing cost, quality, and access metrics across hospitals.
- Incorporate **CMS, AHRQ, and state benchmark datasets** for comparative and trend analyses.
- Build **predictive models** assessing cost of care, service-line efficiency, and workforce distribution.
- Design **geospatial analytics models** using ArcGIS and Power BI for visualizing hospital catchment areas, travel times, and patient access disparities.
- Conduct **scenario modeling** for policy options such as telehealth expansion, service consolidation, or regional partnerships.
- Facilitate **collaborative model validation sessions** with AHS and Green Mountain Care Board (GMCB) representatives.

Deliverables:

- Calibrated and validated analytical models.
- Interim analytics report highlighting preliminary insights.
- Stakeholder review and feedback session outcomes.

Outcome:

Operational analytical models that can generate data-driven insights to inform AHS's hospital transformation strategy.

Phase 4: Visualization, Reporting & Deployment (Weeks 13–16)

Objective: Deliver user-friendly analytics dashboards, reports, and knowledge transfer to ensure usability and long-term sustainability.

Activities:

- Develop **interactive Power BI dashboards** featuring KPIs, benchmarks, and performance comparisons at hospital, regional, and system levels.
- Integrate **geospatial layers** and heatmaps to highlight regional coverage, access gaps, and demographic overlays.

- Conduct **User Acceptance Testing (UAT)** and walkthrough sessions with AHS users to validate functionality and accuracy.
- Deliver **training sessions and technical workshops** for AHS staff to promote dashboard adoption and self-service analytics.
- Document **data dictionaries, model assumptions, and maintenance guides** for future updates.

Deliverables:

- Fully functional and production-deployed dashboards.
- Comprehensive final report summarizing findings, key recommendations, and analytical insights.
- Completion of user training and system handover.

Outcome:

An intuitive, policy-ready analytics platform that empowers AHS with real-time decision support and performance monitoring capabilities.

Phase 5: Ongoing Operations & Support (Month 5 and Beyond)

Objective: Sustain long-term analytical accuracy, incorporate evolving data, and provide continuous technical and strategic support.

Activities:

- Conduct **monthly data refreshes and performance checks**.
- Implement **continuous monitoring** of pipeline health, data integrity, and access controls.
- Provide **quarterly enhancement cycles** based on AHS feedback and emerging requirements.
- Maintain ongoing **compliance documentation** for HIPAA, SOC 2, and state-level security requirements.
- Support **ad hoc analytical requests** from AHS and GMCB as new initiatives emerge.

Deliverables:

- Monthly performance and update reports.
- Quarterly enhancement summaries.
- Continuous improvement documentation and stakeholder review records.

Outcome:

A sustainable, compliant, and continuously improving analytical ecosystem that evolves alongside Vermont's healthcare transformation initiatives.

4.3 Delivery Assurance & Quality Management

Vitosha’s delivery framework is guided by **PMI, CMMI, and Agile methodologies**, ensuring disciplined governance, measurable progress, and stakeholder transparency throughout the engagement.

Key Quality and Assurance Elements:

- **Milestone-Based Accountability:** Each phase has predefined deliverables, measurable acceptance criteria, and stakeholder approval gates.
- **Integrated QA Framework:** Every deliverable undergoes internal peer review, automated QA testing, and client validation before release.
- **Change & Risk Management:** All risks and change requests are tracked in a centralized risk register, with proactive mitigation strategies.
- **Transparent Communication:** Weekly progress reports, biweekly technical review meetings, and monthly executive updates maintain alignment.
- **Scalability & Resilience:** Flexible resourcing ensures uninterrupted progress even during peak workloads or unforeseen challenges.

Through this structured, performance-oriented approach, **Vitosha ensures timely, secure, and high-quality delivery** of all project milestones—enabling the State of Vermont and AHS to achieve actionable insights and measurable transformation outcomes.

Gantt Chart

5. PRICE SCHEDULE

PRICE SCHEDULE

A. Fixed Price Deliverables:

Deliverable Description	Fixed Price
Data Integration & Analysis Plan	\$400,000
Hospital & Regional Access Modeling	\$420,000
Market & Financial Analysis	\$350,000
Evidence-Based Benchmarking Evaluation	\$345,000
Transformation Scenario Model	\$360,000
Final Regional and Hospital Transformation Analytics Report	\$175,000
Total Project Cost (Not to Exceed)	\$2,400,000.00 (\$ 2,050,000)

Name of Bidder: Vitosha Inc.

Signature of Bidder: 

Date: 10-28-2025

Revised: March 18, 2023
Page 19 of 64

6. REFERENCES (per Section 4.8)

Vitosha Inc. provides the following three (3) client references representing projects of comparable scope and complexity delivered within the last 12–24 months. These engagements demonstrate our experience in implementing advanced analytics, data integration, and modernization initiatives across public-sector and enterprise environments.

All contacts listed below have direct knowledge of Vitosha’s work and performance. Contact details are verified and current as of October 2025.

Reference 1

Organization: State of Illinois – Department of Technology Services / University of Chicago

Project Title: Enterprise Service Modernization & Data Integration Platform

Engagement Period: January 2023 – Present

Status: On Schedule (Multi-phase Ongoing Project)

Project Description:

Vitosha serves as the prime vendor supporting the State of Illinois’ and University of Chicago’s joint modernization effort to unify legacy IT systems and implement a centralized data analytics and integration platform. The engagement includes:

- Implementation of ServiceNow for workflow automation and ITSM modernization.
- Azure-based data lake and ETL pipelines to consolidate statewide operational data.
- Advanced Power BI dashboards for executive and operational reporting.
- Training and knowledge transfer sessions for university and state staff.

Primary Contact:

Name: Avinash Venkataboyina, Senior ServiceNow Developer

Email: avenkat23@uchicago.edu

Phone: +1 (330) 322-2747

Reference 2

Organization: Republic Services – Government Services Division

Project Title: Waste Management Analytics & Route Optimization Platform

Engagement Period: February 2023 – Present

Status: Active

Project Description:

Vitosha leads the development and implementation of Republic Services’ analytics platform for municipal waste operations. The project integrates data from multiple jurisdictions to improve operational efficiency and sustainability. Key components include:

- Development of predictive analytics models for route optimization and demand forecasting.
- Creation of Power BI dashboards to visualize service performance and compliance metrics.
- Integration of IoT sensor data and fleet telematics with Azure Synapse and Data Factory.
- Deployment of self-service analytics tools to support municipal decision-making.

Primary Contact:

Name: Sai Mangolu Vivek

Email: SVivek@republicservices.com

Phone: +1 (510) 458-1030

Reference 3

Organization: Florida Department of Education (FLDOE)

Project Title: Student Performance Analytics & Literacy Data Dashboard

Engagement Period: April 2024 – Present

Status: Active (Phase 2 Implementation)

Project Description:

Vitosha is delivering a cloud-based analytics and visualization platform for the Florida Department of Education to enhance literacy program outcomes and data-driven decision-making across districts. The engagement includes:

- Development of an AI-powered student performance analytics dashboard.
- Integration of multiple student information and assessment data sources.
- Implementation of secure Azure-based data pipelines and Power BI visualizations.
- Continuous improvement and sustainability support through training and knowledge transfer to FLDOE staff.

Primary Contact:

Name: Varshith Kumar Reddy Dasari

Email: Varshith.dasari@fldoe.org

Phone: +1 (615) 856-4079

Summary of Relevance

These references reflect Vitosha's proven capability in delivering **data analytics, digital modernization, and visualization solutions** for public-sector and enterprise clients. Each engagement demonstrates our expertise in:

- Managing multi-phase implementations with parallel workstreams.
- Ensuring data quality, security, and compliance under HIPAA, FERPA, and state IT standards.
- Providing scalable, cloud-native solutions with embedded sustainability and knowledge transfer.

This part of the page is left blank intentionally.

7. REPORTING SAMPLE (per Section 4.9)

Vitosha Inc. will provide comprehensive, data-driven reporting deliverables throughout the engagement. Each report will be designed to communicate analytical findings clearly, support executive decision-making, and ensure traceability from data to insight. Reports will combine narrative summaries, visual analytics, and structured data tables to ensure accessibility for both technical and policy audiences.

7.1 Example Report Components

Each formal analytical report will follow a consistent structure, ensuring that AHS stakeholders receive actionable insights in a concise, repeatable format.

1. Executive Summary (2–3 pages)

A concise overview of key findings, emerging trends, and actionable recommendations. This section highlights priority areas for intervention and summarizes performance trajectories across Vermont’s hospitals.

Example:

Analysis of Q1–Q2 2025 hospital data indicates that inpatient utilization decreased by 3.4% year-over-year, driven primarily by outpatient care expansion and telemedicine uptake. Three critical access hospitals showed cost-per-case reductions exceeding 5%, while rural ED wait times rose modestly. Recommendations include expanding tele-triage programs and evaluating hospital-at-home pilots in two counties.

2. Methodology & Data Sources

A detailed explanation of the analytical process, including data extraction, transformation, validation, and modeling steps.

Example Elements:

- Data ingestion via Azure Data Factory pipelines from AHS, CMS, and HCRIS sources.
- Validation through automated data quality checks (completeness, consistency, and referential integrity).
- Statistical modeling conducted using Databricks notebooks with reproducible code repositories.
- Comparative benchmarks drawn from CMS Hospital Compare and AHRQ datasets.

3. Access & Geospatial Findings

Visual and quantitative analysis of hospital access, including drive-time coverage, service overlap, and cross-border patient flow.

Example Highlights:

- 87% of Vermont’s population resides within a 25-minute drive of a general acute care facility.
- Northwestern and southern rural corridors show the largest access gaps, with median drive times exceeding 30 minutes.
- Seasonal population surges in resort areas drive temporary ED overcapacity between December–February.
- Maps show cross-border care flows into New Hampshire and New York hospitals, especially for specialty services (e.g., oncology, cardiology).

4. Financial & Market Analysis

Financial analytics summarizing hospital margins, service-line sustainability, and projected transformation impacts.

Example Highlights:

- Statewide Total Cost of Care (TCOC) decreased by 1.4% between 2023–2024.
- Rural hospitals operate at an average margin of –2.1%, compared to +1.3% for urban peers.
- Workforce shortages contributed to a 6.8% increase in contracted labor costs.
- Scenario modeling shows that targeted consolidation of low-volume service lines could reduce total cost by 1.6% without major access loss.

5. Benchmarking

Facility performance scorecards compared against state and national peers using standardized KPIs.

Example Metrics:

Facility	Readmission Rate (%)	Avg. LOS (Days)	Net Margin (%)	CMS Quality Score	Overall Rank (VT)
Central Vermont Medical Center	8.9	4.3	0.7	91	3
Springfield Hospital	11.5	4.8	–2.4	87	7
North Country Hospital	10.2	5.1	–1.6	84	6
Rutland Regional Medical Center	8.1	3.9	1.9	92	2

Benchmarking dashboards will display hospital rankings, percentile positions, and trend lines over time to support evidence-based decisions.

6. Scenario Modeling Outcomes

Comparative projections for alternative policy or service-delivery scenarios, quantifying the expected cost, access, and quality impacts.

Example Summary:

Metric	Baseline (2024)	Scenario A: Consolidate Two Low- Volume Units	Scenario B: Telehealth Expansion	% Change vs. Baselin e	Observation s
Total Cost of Care (Statewide)	\$1,250,000,000	\$1,230,500,000	\$1,238,200,000	–1.6% to –0.9%	Moderate cost reduction with minimal access impact.
Avoidable ACSC Admissions	3,450	2,980	3,120	–13.6% to –9.6%	Telehealth programs improve early intervention outcomes.
Avg. Drive Time to ED (min)	22.4	27.6	23.2	+23.2% / +3.6%	Consolidation increases rural drive times; telehealth mitigates effects.
Workforce Vacancy Rate	14.2%	12.9%	11.7%	–9% to –17%	Digital care models reduce pressure on clinical staffing.

Narrative Interpretation:

Scenario A (service-line consolidation) produces measurable cost efficiency but raises localized access concerns. Scenario B (telehealth expansion) offers balanced improvements in

both cost and accessibility, making it a preferred short-term strategy under current demographic conditions.

7. Summary Recommendations

Each report concludes with a concise set of prioritized, actionable recommendations that align with the state’s transformation goals.

Example Recommendations:

1. **Expand advanced primary care capacity** in underserved regions through incentive alignment and tele-triage adoption.
2. **Integrate geospatial analytics** into resource allocation decisions for ambulance and urgent care coverage.
3. **Pilot “Hospital-at-Home” models** to reduce rural inpatient strain and enhance continuity of care.
4. **Implement quarterly data validation routines** to sustain the integrity of cost and quality analytics.

8. Technical Appendices & Audit Trails (internal to report)

Each report includes complete data dictionaries, model documentation, transformation lineage, and reproducibility references, ensuring that every analytical finding can be independently verified.

Example Contents:

- Variable definitions and transformation logic.
- Model coefficients and validation statistics (R^2 , RMSE, CI values).
- Code version history and audit timestamps.
- Data source references (AHS extracts, CMS datasets, HCRIS reports).

7.2 Sample Table (Illustrative Extract)

Metric	Baseline (2024)	Scenario (Consolidate X)	A % Change	Notes
Total Cost of Care (Statewide)	\$1,250,000,000	\$1,230,500,000	−1.6%	Scenario assumes 12-month ramp period.
Avoidable ACSC Admissions	3,450	2,980	−13.6%	Reduction driven by expanded advanced primary care.

Avg. Drive Time to ED (minutes)	22.4	27.6	+23.2%	Rural access sensitivity flagged for mitigation.
Workforce Vacancy Rate	14.2%	12.9%	−9.2%	Telemedicine offset anticipated labor gaps.
Readmission Rate (%)	9.8	9.3	−5.1%	Enhanced discharge coordination under transformation plan.

7.3 Report Design and Visualization Approach

Reports will be accompanied by **interactive visual dashboards** using Microsoft Power BI, allowing dynamic filtering by geography, facility, and time period. Each visualization will include:

- **Trend charts** for utilization, cost, and quality measures.
- **Heatmaps and isochrone maps** highlighting coverage disparities.
- **Drill-down views** enabling comparison by payer type, service line, or demographic group.
- **Scenario toggles** allowing AHS stakeholders to visualize “what-if” outcomes dynamically.

All visuals will be developed following state accessibility guidelines (WCAG 2.1 AA) to ensure usability across stakeholder audiences.

7.4 Reporting Cadence

Vitosha will provide reports and dashboards on a **monthly** basis during the implementation period, transitioning to **quarterly** updates in the maintenance phase. Each cycle will include:

- Updated KPIs and benchmarks.
- Change summaries highlighting new trends or anomalies.
- Annotated insights for policy interpretation.
- A performance narrative highlighting key wins, emerging risks, and corrective actions.

This structured reporting approach ensures that AHS leadership, analysts, and policymakers have timely, data-rich insights to guide Vermont’s ongoing hospital transformation initiatives.

This part of the page is left blank intentionally.

8. CERTIFICATE OF COMPLIANCE (Section 4.11)

Vitosha Inc. hereby certifies compliance with all terms, conditions, and requirements outlined in the RFP, including those related to equal opportunity, fair labor, ethical procurement, and environmental sustainability.

In accordance with **Executive Order 05-16 (Climate Change Considerations)**, Vitosha affirms its commitment to environmentally responsible business operations. The company actively supports sustainability initiatives through:

- Use of cloud-based infrastructure to minimize on-premise energy consumption.
- Implementation of remote collaboration tools to reduce travel-related emissions.
- Responsible equipment lifecycle management, including e-waste recycling and vendor take-back programs.
- Digital-first documentation practices to reduce paper usage.

For bid amounts exceeding \$250,000, Vitosha acknowledges and accepts the **Worker Classification Compliance** requirements stipulated under Section 3.4 of the RFP. Upon contract award, we will submit the required **Self-Reporting** and **Subcontractor Reporting** forms to ensure full compliance with state labor and classification standards.

All employees and project staff assigned to this engagement are properly classified under federal and state law, and Vitosha maintains active worker's compensation insurance coverage for all personnel.

This part of the page is left blank intentionally.

Certificate of Compliance:

The signed and completed Certificate of Compliance form is attached below as part of this proposal submission.

RFP/PROJECT:
DATE:
 Page 1 of 4

CERTIFICATE OF COMPLIANCE

For your bid to be considered valid, this form must be completed in its entirety, executed by a duly authorized representative of the bidder, and submitted as part of the response to the proposal.

A. NON COLLUSION: Bidder hereby certifies that the prices quoted have been arrived at without collusion and that no prior information concerning these prices has been received from or given to a competitive company. If there is sufficient evidence to warrant investigation of the bid/contract process by the Office of the Attorney General, bidder understands that this paragraph might be used as a basis for litigation.

B. CONTRACT TERMS: Bidder hereby acknowledges that is has read, understands and agrees to the terms of this RFP, including Attachment C: Standard State Contract Provisions, and any other contract attachments included with this RFP.

C. WORKER CLASSIFICATION COMPLIANCE REQUIREMENT: In accordance with Section 32 of The Vermont Recovery and Reinvestment Act of 2009 (Act No. 54), the following provisions and requirements apply to Bidder when the amount of its bid exceeds \$250,000.00.

Self-Reporting. Bidder hereby self-reports the following information relating to past violations, convictions, suspensions, and any other information related to past performance relative to coding and classification of workers, that occurred in the previous 12 months.

Summary of Detailed Information	Date of Notification	Outcome
N/A		

Subcontractor Reporting. Bidder hereby acknowledges and agrees that if it is a successful bidder, prior to execution of any contract resulting from this RFP, Bidder will provide to the State a list of all proposed subcontractors and subcontractors' subcontractors, together with the identity of those subcontractors' workers compensation insurance providers, and additional required or requested information, as applicable, in accordance with Section 32 of

Revised: March 18, 2025
 Page 11 of 64

The Vermont Recovery and Reinvestment Act of 2009 (Act No. 54), and Bidder will provide any

Revised: March 18, 2023
Page 12 of 64

update of such list to the State as additional subcontractors are hired. Bidder further acknowledges and agrees that the failure to submit subcontractor reporting in accordance with Section 32 of The Vermont Recovery and Reinvestment Act of 2009 (Act No. 54) will constitute non-compliance and may result in cancellation of contract and/or restriction from bidding on future state contracts.

D. Executive Order 05 – 16: Climate Change Considerations in State Procurements Certification

Bidder certifies to the following (Bidder may attach any desired explanation or substantiation. Please also note that Bidder may be asked to provide documentation for any applicable claims):

1. Bidder owns, leases or utilizes, for business purposes, space that has received:

- ☐ Energy Star® Certification
- ☐ LEED®, Green Globes®, or Living Buildings Challenge™ Certification
- ☐ Other internationally recognized building certification:

N/a

2. Bidder has received incentives or rebates from an Energy Efficiency Utility or Energy Efficiency Program in the last five years for energy efficient improvements made at bidder's place of business. Please explain:

N/A

3. Please Check all that apply:

- ☐ Bidder can claim on-site renewable power or anaerobic-digester power ("cow-power"). Or bidder consumes renewable electricity through voluntary purchase or offset, provided no such claimed power can be double-claimed by another party.
- ☐ Bidder uses renewable biomass or bio-fuel for the purposes of thermal (heat) energy at its place of business.
- ☒ Bidder's heating system has modern, high-efficiency units (boilers, furnaces, stoves, etc.), having reduced emissions of particulate matter and other air pollutants.
- ☐ Bidder tracks its energy consumption and harmful greenhouse gas emissions. What tool is used to do this? _____
- ☒ Bidder promotes the use of plug-in electric vehicles by providing electric vehicle charging, electric fleet vehicles, preferred parking, designated parking, purchase or lease incentives, etc..
- ☐ Bidder offers employees an option for a fossil fuel divestment retirement account.
- ☒ Bidder offers products or services that reduce waste, conserve water, or promote energy efficiency and conservation. Please explain:

Use of EV in Office Cab Facilities.

Revised: March 18, 2023
Page 14 of 64

4. Please list any additional practices that promote clean energy and take action to address climate change:

Use of EV to reduce fuel emission.

E. Executive Order 02 – 22: Solidarity with the Ukrainian People

- ☒ By checking this box, Bidder certifies that none of the goods, products, or materials offered in response to this solicitation are Russian-sourced goods or produced by Russian entities. If Bidder is unable to check the box, it shall indicate in the table below which of the applicable offerings are Russian-sourced goods and/or which are produced by Russian entities. An additional column is provided for any note or comment that you may have.

Provided Equipment or Product	Note or Comment

F. **Certification Regarding Use of Contract Funds for Lobbying** - Applicable to contracts over \$100,000.00 when federal monies are involved - this clause must be included in all subcontracts over \$100,000.00.

1. The prospective contractor certifies, to the best of his or her knowledge and belief, under the penalties of perjury under the laws of the State of Vermont and the United States that on behalf of the person, firm, association, or corporation he or she represents, that:

a. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

b. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative

Revised: March 18, 2023
Page 16 of 64

agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

2. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by 31 U.S.C. 1352. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

3. The prospective contractor also agrees that they shall require that the language of this certification be included in all lower tier subcontracts, which exceed \$100,000 and that all such recipients shall certify and disclose accordingly.

9. CONFLICT OF INTEREST & DISCLOSURES (Section 3.3)

Vitosha Inc. certifies that a thorough internal review has been conducted to identify any actual or potential **Organizational or Personal Conflicts of Interest (OCI/PCI)** related to this engagement.

As of the date of submission, **no conflicts of interest exist** that would prevent objective, impartial, and faithful performance of the contract.

Should any potential conflicts arise during the period of performance, Vitosha will:

- Immediately disclose the conflict in writing to the State Contracting Officer.
- Provide a detailed explanation and proposed mitigation strategy.
- Reassign or firewall any personnel, systems, or subcontractors if required to preserve impartiality.

Vitosha maintains an internal **Ethics and Compliance Committee** that oversees contract integrity, ensuring that all engagements meet the highest standards of professional conduct, transparency, and public accountability.

10. SECURITY, PRIVACY & COMPLIANCE SUMMARY

Vitosha operates under a **comprehensive security, privacy, and compliance framework** designed to meet and exceed state and federal requirements for healthcare and public-sector data systems. All components of the proposed solution will be hosted within **Microsoft Azure Government or Azure Commercial Cloud**, depending on Vermont's security classification requirements.

Key Security Controls

- **HIPAA/HITECH Alignment:** All systems comply with healthcare privacy and security standards, including encryption of PHI and PII at all stages.
- **Encryption Standards:** AES-256 encryption for data at rest; TLS 1.3 encryption for all data in transit.
- **Identity & Access Management:** Azure Active Directory (Azure AD) with Role-Based Access Control (RBAC), Multi-Factor Authentication (MFA), and Privileged Identity Management (PIM).
- **Network Security:** Azure Private Link, firewall restrictions, and endpoint hardening to prevent unauthorized access.
- **Key Management:** Azure Key Vault integrated with Hardware Security Modules (HSM) for key rotation and credential storage.
- **Logging & Monitoring:** Continuous telemetry via Azure Monitor, Log Analytics, and SIEM integration for real-time anomaly detection.

Governance & Audit Controls

- Business Associate Agreement (BAA) executed with all relevant parties prior to data exchange.
- Quarterly access reviews and internal security audits.
- Annual penetration testing and vulnerability assessments conducted by certified third parties.
- Segregated financial cost centers for federal grant accounting with monthly reconciliations and audit trails.

Vitosha's compliance posture is continually reviewed against **SOC 2 Type II**, **ISO 27001**, and **NIST 800-53** frameworks to ensure enduring operational integrity.

11. RISK MANAGEMENT & MITIGATION

Vitosha applies a **proactive risk management framework** to identify, monitor, and mitigate risks throughout the project lifecycle. Our approach emphasizes transparency, documentation, and early intervention to prevent schedule or quality impacts.

Key Risk Categories and Mitigation Strategies

Risk Area	Potential Impact	Mitigation Strategy
BAA or SFTP Delay	Delay in initial data access or onboarding	Parallel track initiation with simulated data; expedited legal and technical review; pre-approved staging environment.
Data Quality Issues	Inaccurate insights or rework	Initial profiling sprint, automated quality validation scripts, error alerts, and data vendor SLAs for reprocessing.
Model Drift or Performance Degradation	Reduced accuracy over time	Scheduled retraining cycles, SME revalidation, and version-controlled model tracking.
Scope Creep or Change Requests	Timeline and cost impact	Structured change control governance with impact analysis and client sign-off.
Security Incidents or Breach Risks	Data exposure or downtime	Layered defense-in-depth design, intrusion detection, and rapid incident response protocol.
Staff Availability	Delayed deliverables	Backup staffing pool and cross-training to ensure uninterrupted operations.

Governance and Oversight

All risks are tracked in an active risk register reviewed weekly by the Project Manager and biweekly during governance meetings with AHS stakeholders. Each risk entry includes probability, impact, owner, and mitigation status, ensuring accountability and visibility throughout execution.

12. SUSTAINABILITY & KNOWLEDGE TRANSFER

Vitosha's delivery philosophy emphasizes **long-term sustainability** and **knowledge self-sufficiency** for the State of Vermont. The objective is not only to implement advanced analytical tools but also to empower AHS staff to independently operate, maintain, and expand them post-engagement.

Sustainability Strategy

- **Operational Handover:** A phased transition of analytical pipelines, dashboards, and data environments to designated state personnel following acceptance testing.
- **Governance Continuity:** Documentation of key processes, including access control reviews, change management workflows, and system maintenance schedules.
- **Scalable Architecture:** Modular Azure design allowing the State to onboard additional data sources, modify models, and evolve reporting with minimal dependency.

Knowledge Transfer Plan

- **Training Sessions:** Conducted for both administrative and analytics staff, covering environment access, dashboard management, data refresh procedures, and troubleshooting.
- **Technical Runbooks:** Step-by-step operational manuals detailing pipeline execution, CI/CD workflows, and ML model retraining processes.
- **Code Repositories & Reproducible Notebooks:** Delivered with documentation to ensure transparency, version control, and auditability of all analytical processes.
- **Mentorship & Shadowing:** Joint working sessions during the final project month to enable state personnel to perform hands-on operations under Vitosha's guidance.

Optional Ongoing Support

After the knowledge transfer phase, Vitosha can provide an **optional managed analytics service** for continuous improvement, environment monitoring, and quarterly data refresh cycles. This ensures analytical continuity and support for evolving policy requirements while maintaining flexibility for the State to operate independently.

Appendix

Resume of Key Personnels

Doonarine Lall	
Title: Project Manager	
Professional Summary	
Results-driven technology and transformation leader with over 12 years of experience managing sales, delivery, and client engagement for public sector and enterprise modernization projects. Recognized for exceptional performance as a #1 Sales Leader across multiple business units and markets, with proven expertise in managing multi-phase initiatives involving analytics, modernization, and stakeholder coordination. At Vitosha Inc. , Doonarine leads healthcare data and cloud transformation programs for government clients, ensuring scope, schedule, and quality alignment across technical and analytical workstreams. Skilled in translating business objectives into actionable implementation roadmaps and overseeing full project lifecycle from planning through post-deployment support.	
Key Competencies	
- Project & Program Management (Agile / PMP-aligned) - Healthcare Data & Analytics Delivery - Client & Stakeholder Relationship Management - Proposal & Statement of Work Development - Cloud and Data Modernization (Microsoft 365, Azure) - Strategic Account Planning & Reporting - Cross-Functional Team Leadership - Risk, Budget, and Quality Control	
Professional Experience	
Vitosha Inc. – <i>Project Manager,</i>	<i>April 2024 – Present</i>
- Serves as Project Manager for multi-state healthcare analytics and modernization initiatives, overseeing delivery teams across data integration, Power BI reporting, and cloud migration. - Manages coordination between technical leads, client stakeholders, and data analysts to ensure alignment with project milestones and compliance requirements. - Developed and implemented governance and reporting frameworks to track deliverable status, budget adherence, and data quality KPIs. - Leads proposal and SOW development efforts for expansion phases, contributing to successful contract renewals and scope extensions. - Ensures adherence to project timelines, escalation protocols, and risk mitigation plans while maintaining 100% client satisfaction across active engagements. - Key achievements include improving cross-agency data reporting efficiency by 30% and reducing operational turnaround time through analytics automation.	
Accenture – <i>Senior Inside Sales Specialist</i>	<i>October 2023 – March 2024</i>
- Managed enterprise client relationships for public sector and hospitality industries, driving multi-million-dollar Microsoft support engagements. - Partnered with engineering and operations teams to deliver customized proposals and solution roadmaps aligned with client modernization goals. - Enhanced sales process efficiency and forecasting accuracy through CRM analytics and strategic reporting.	
Microsoft Corporation – <i>Sales & Solution Leadership</i>	<i>August 2015 – September 2023</i>
Sr. Modern Work Sales Specialist (Unified Support Pilot) — <i>Jan 2023 – Jul 2023</i>	

• Closed \$10M+ in enterprise modernization contracts, leveraging strategic deal structuring and executive stakeholder management. • Optimized pricing and proposal quality, achieving a 20% faster deal cycle and 30% account growth through solution expansion.	
Senior Web Sales & Support Associate —	<i>Jan 2020 – Jan 2023</i>
• Managed 500+ enterprise agreements generating \$6M+ in new revenue. • Improved proposal responsiveness and conversion by 18%, increasing overall customer satisfaction to 4.7/5.	
Small & Medium Business Account Manager —	<i>Nov 2018 – Jan 2020</i>
• Expanded customer base by 20% through targeted outreach and account development. • Closed \$4M+ in combined hardware and cloud service contracts.	
Cloud Expert —	<i>Aug 2015 – Nov 2018</i>
• FY17 Q4 CPE Champion Award Winner – New York Metro Market. • Supported major cloud adoption programs through ROI-driven proposals and adoption strategies. • Achieved 100% quota attainment for three consecutive years.	
Education	
Associate of Science in Computer Science	
<i>Katherine Gibbs School, New York, NY</i>	
Certifications	
• Microsoft Copilot Expert Champion (2025) • Microsoft 365 Fundamentals (2024) • SC-900: Security, Compliance & Identity Fundamentals (2024) • Microsoft Office Specialist (2024) • Microsoft Copilot for M365 Achiever – Foundational (2024)	
Technical Proficiency	
• Platforms: Microsoft 365, Azure, Power BI, SharePoint, Teams • CRM Tools: Microsoft Dynamics 365, Salesforce • AI & Analytics: Microsoft Copilot, ChatGPT, LinkedIn Sales Navigator, AI-driven Forecasting • Collaboration Tools: Google Workspace, Slack, Zoom, WebEx	

Mousmi Shah-Gandhi	
Title: General Manager	
Professional Summary	
Accomplished and results-oriented professional with 15 years of diverse experience in human resources, operations management, and strategic leadership across IT consulting, construction, and education sectors.	
As General Manager at Vitosha Inc. , Mousmi oversees end-to-end operations including workforce management, compliance, payroll optimization, and cross-border resource planning. Adept at developing scalable HR and administrative frameworks that enhance organizational efficiency and employee engagement.	
Recognized for strong analytical and communication skills, a data-driven approach to decision-making, and the ability to align people, processes, and technology with strategic business goals.	
Core Competencies	
• Strategic Operations & General Management • Human Resource Leadership & Workforce Planning • Payroll Administration & Global Compliance • Immigration & Mobility Management • Recruitment, Retention & Performance Management • Risk Mitigation & Regulatory Adherence (Federal, State, Immigration) • Cross-Functional Team Leadership & Mentoring • Vendor & Partner Negotiation • Process Optimization & Automation (HRIS, Payroll, Data Systems) • Employee Engagement, Training & Development	
Professional Experience	
Vitosha Inc. – <i>General Manager, King of Prussia, PA</i>	<i>July 2020 – Present</i>
• Lead organizational operations for a 145+ employee technology and consulting firm, overseeing HR, finance, compliance, and delivery governance. • Spearhead end-to-end IT consulting initiatives, ensuring projects align with corporate objectives and client deliverables across healthcare, public sector, and financial domains. • Direct payroll operations across domestic and offshore teams, ensuring accuracy, compliance, and efficiency in multi-jurisdictional environments. • Manage immigration and global mobility processes, facilitating visa applications, work authorization, and regulatory compliance for technical personnel. • Develop and implement strategic HR frameworks including performance management, benefits administration, and workforce development programs. • Collaborate with executive leadership and project managers to align resource allocation with active project portfolios and business growth objectives. • Negotiate vendor and technology contracts, achieving cost reductions and operational scalability through automation and process re-engineering. • Conduct compliance audits, risk assessments, and workforce analytics to ensure operational excellence and adherence to company policies. • Mentor and guide cross-functional teams in HR, payroll, and IT systems, fostering collaboration and accountability across departments.	
Shreeji Construction – <i>HR Assistant, Seychelles</i>	<i>January 2018 – February 2019</i>
• Supported procurement and HR operations by managing supplier relationships, inventory planning, and workforce development programs.	

Conducted recruitment, onboarding, and employee training to bridge skill gaps and promote workforce engagement.
Developed and maintained compensation structures and job classification systems to improve transparency and retention.
Streamlined documentation, shipping, and administrative processes to enhance operational efficiency.
S G Product – HR Assistant <i>March 2017 – October 2017</i>
Coordinated end-to-end recruitment, employee onboarding, and monthly payroll processing.
Maintained employee data accuracy and compliance with labor laws.
Served as the first point of contact for management and staff on HR-related inquiries, ensuring consistent policy application and communication.
Crescent International School – Assistant to Administration & Business Studies Tutor
<i>Kano, Nigeria</i> <i>May 2014 – December 2016</i>
Supported academic administration, logistics, and student engagement initiatives for a K–12 institution.
Designed course curricula and educational standards in business studies.
Managed school events, communications, and policy implementation.
Introduced digital content management on the school website to improve information accessibility.
Education
Master of Business Administration (PGDBA), Operations Management (Distance Education) MIT – University of Pune 2013 – 2015
Bachelor of Commerce (First Class) University of Mumbai 1995 – 2000
Technical & Professional Skills
HRIS & Payroll Systems: Zoniac, QuickBooks, ADP, and Excel-based Payroll Frameworks
Software Tools: Microsoft Word, Excel, PowerPoint, Teams, Zoom, WebEx
Core Skills: Data Analysis, HR Documentation, Policy Development, and Reporting
Other Skills: Strategic Planning, Team Leadership, Problem Solving, Presentation Skills, Communication, and Cross-Cultural Collaboration
Certifications & Additional Highlights
Proficient in Federal, State, and Immigration Employment Regulations
Demonstrated success in remote and hybrid workforce management
Recognized for building HR and administrative frameworks that support digital transformation initiatives

VIVEK MENON M	
Solutions Architect – AI, Data, and Cloud Modernization	
PROFESSIONAL SUMMARY	
Innovative Solutions Architect and AI Project Manager with over 7 years of experience in Generative AI, NLP, Machine Learning, Data Science, and MLOps . Proven expertise in leading end-to-end AI modernization programs, cloud-native analytics, and enterprise data integration initiatives across public and private sectors. Adept at translating complex business requirements into scalable AI and data-driven solutions that drive measurable efficiency and innovation.	
At Vitosha Inc. , Vivek leads design and implementation of AI-powered analytics platforms, data modernization programs, and predictive intelligence dashboards for clients in education, government, and financial domains . Strong technical and leadership track record in Vertex AI, Azure ML, GCP BigQuery ML, and modern DevOps CI/CD pipelines , with hands-on experience in LLM-based automation, entity extraction, and real-time data visualization .	
CORE COMPETENCIES	
Domains: AI/ML Solution Architecture, MLOps, Generative AI, NLP, Predictive Analytics, Data Integration, Cloud Architecture	
Tools & Platforms: Power BI, Tableau, Vertex AI, Azure ML, BigQuery, GCS, Streamlit, Flask, FastAPI	
Programming Languages: Python, R, SQL, Julia	
Frameworks & Libraries: TensorFlow, PyTorch, Scikit-learn, Keras, SpaCy, LangChain, Hugging Face, PyCaret	
Data Visualization: Power BI, Plotly, Matplotlib, Seaborn	
Cloud & CI/CD: GCP, Azure, AWS, Kubernetes, Docker, GitHub Actions	
PROFESSIONAL EXPERIENCE	
Vitosha Inc. – Solutions Architect / AI Project Manager	June 2023 – Present
Client Portfolio: Public Sector (State of Kansas, Con Edison, State of Florida), Education (University of Chicago), Financial (Northern Trust)	
Role & Responsibilities	
Lead AI and Data Modernization projects across government, education, and enterprise sectors, managing multi-disciplinary teams of data engineers, analysts, and ML developers.	
Architect end-to-end AI ecosystems using Vertex AI and Azure ML, ensuring scalability, data integrity, and governance across integrated pipelines.	
Oversee project delivery lifecycle—requirements gathering, design, implementation, QA, deployment, and knowledge transfer.	
Design and deploy Predictive Analytics Dashboards leveraging Power BI and GCP BigQuery for real-time decision support in workforce, literacy, and operational analytics programs.	
Manage FTE planning, agile sprint cycles, and stakeholder communication, ensuring adherence to contractual timelines and KPIs.	
Develop LLM-based automation systems (e.g., document intelligence, student analytics, and chatbot modules) to streamline manual reporting and information retrieval.	
Integrate data quality monitoring and MLOps pipelines with automated model versioning, performance tracking, and cloud monitoring.	
Selected Achievements	

Spearheaded delivery of a State Education Department Data Dashboard, consolidating literacy KPIs across 250+ districts and enabling evidence-based policy planning.
Led design of a Predictive Workforce Planning Tool for a state agency, reducing manual reporting effort by 75% and increasing data timeliness by 40%.
Developed a cloud-native AI-powered invoice entity extraction framework achieving 95%+ accuracy across 10 business units.
Successfully implemented multilingual AI chatbot across multiple clients, driving 40% improvement in citizen engagement.
Established automated deployment workflows with CI/CD and MLOps, reducing model refresh cycle time by 60%.
Renault Nissan Technology & Business Center India (RNTBCI)
Senior Engineer – Data Science & AI May 2022 – June 2023
Designed and deployed Generative AI and NLP-based automation POCs, later transitioned to full-scale production systems.
Collaborated with cross-functional teams to deliver AI-powered chatbot, winning the Silver Innovation Award.
Implemented energy prediction systems using predictive analytics for plant-level efficiency optimization.
Allianze Infosoft
AI Developer Jan 2020 – May 2022
Built NLP solutions such as sentiment analyzers and intelligent chatbots.
Delivered data analytics dashboards improving client productivity and decision-making efficiency.
Symptots
Software Developer (AI) Sep 2018 – Dec 2019
Developed computer vision modules and Rasa-based chatbots for client-facing automation solutions.
EDUCATION
PG Diploma – Electronic Product Design & Manufacturing
National Institute of Electronics and IT (NIELIT), Calicut 2018
Bachelor of Technology – Electronics and Communication Engineering
NSS College of Engineering, Palakkad 2017
CERTIFICATIONS
Google Cloud Professional Machine Learning Engineer
Microsoft Certified: Azure Data Scientist Associate
TensorFlow Developer Certification
