

HTR Book v24 — Complete Edit Report

Document: HTR_Book_v24.md
Edited by: Claude Code (AI Editor)
Date: April 27, 2026
Original file: 4,795 lines / 1.4MB
Final file: 5,285 lines / ~1.5MB

SUMMARY

The book was read in full across four sessions covering all 5,157+ lines. Changes fall into five categories:

- Image placeholders replaced** — all 8 `![] [imageX]` broken references replaced with text diagrams, ASCII charts, and data tables
- Content corrected** — VBC Readiness Assessment domains, scoring, and tool references aligned with the actual codebase
- Cross-reference errors fixed** — wrong chapter numbers, missing TOC entry, broken URLs, typos
- Print/formatting improvements** — broken tables fixed, tier headings fixed, blank lines cleaned
- New content added** — quick-reference card, Conclusion sources, VBC sample assessment, Figure 16.6 table

CATEGORY 1 — IMAGE PLACEHOLDERS REPLACED (8 total)

1.1 Cover Page — `![] [image1]`

Location: Line 9 (original)
Problem: Blank image reference on cover page — prints as nothing
Fix: Replaced with a full ASCII title frame showing all 6 pillars in a hub-and-spoke layout with "Health Transformation Review / April 2026" branding

1.2 Figure 1.1 — `![] [image2]`

Location: Chapter 1, before "The Problem with Single-Pillar Thinking"
Caption was: "Figure 1.1 — The six pillars:" (incomplete)
Fix: Replaced with a full ASCII hexagon diagram showing all 6 pillars with:

- Pillar names and numbers (1–6)
- Diagnostic questions ("Is it permissible?", "Is it sustainable?", etc.)
- Vermont examples for each (Acts 167 & 68, RBP + Global Budgets, VHCURES·FHIR, Blueprint·CoCM, SDOH·HEROI, RHRC·CIN)
- Central "SYSTEM OUTCOMES — All Six Required" hub
- Dependency type legend
- Updated caption pointing to htrintelligence.com/framework

1.3 Figure 1.3 — `![] [image3]`

Location: Chapter 1, "The Architecture of Interdependency"
Caption was: "Figure 1.3 — The Architecture of Interdependency: The Fifteen Dependency Relationships"
Fix: Replaced with a complete text map of all 15 directed dependency relationships:

- All 15 arrows listed with from→to pillar, relationship type, and one-line mechanism
- Example: POLICY (1) —enables→ ECONOMICS (2) "Act 68 forces mandatory RBP + global budgets"

- Full legend explaining enables/drives/requires/constrains with color codes
- Updated caption pointing to interactive version at htrintelligence.com/framework

1.4 Figure 2.1 — ![][image4]

Location: Chapter 2, after the Vermont crisis sidebar
Caption was: "Figure 2.1 — The Six-Pillar Execution Sequence"
Fix: Replaced with a staged flow diagram showing all 6 execution stages:

- Each stage labeled with pillar name, role tag (FOUNDATION/SUBSTRATE/INCENTIVES/MECHANISM/CALIBRATION/EXECUTION)
- Vermont anchors for each stage (e.g., "VHCURES · VITL/VHIE · AHS-GMCB Analytics Vendor (McKinsey)")
- "WHY" rationale for each stage's position in the sequence
- Downward arrows connecting each stage
- Updated caption highlighting the key insight: Technology before Economics

1.5 Figure 2.2 — ![][image5]

Location: Chapter 2, after "The Failure Cascade: How Sequencing Errors Compound"
Caption was: "Figure 2.2 — Vermont anchors and OneCare sequencing failures by execution stage"
Fix: Replaced with a 3-gap structural cascade diagram:

- Three labeled boxes for each sequencing gap (Economics Without Policy, Economics Without Technology, Payment Risk Before Infrastructure)
- Each box shows: ERROR, DIRECT consequence, CASCADE effect
- Downward arrows labeled "compounds with ↓" between each gap
- Final box: "SYSTEM-LEVEL OUTCOME: ORGANIZATIONAL WIND-DOWN (~10 YEARS)" with the key finding: "FAILURE WAS ARCHITECTURAL, NOT OPERATIONAL"
- Vermont's corrective response noted at the bottom

1.6 Figure A.3 — ![][image6]

Location: Appendix A, Section A.4 "Vermont's Hospital System"
Caption was: "Figure A.3 — Vermont Hospital Financial Positions: FY2023 vs. national benchmarks"
Fix: Replaced with a two-panel ASCII data chart:

- Left panel: Operating margins by hospital (RRMC -4.2%, BMH -6.1%, Springfield -8.9%, etc.) vs. +3.0% national benchmark
- Right panel: Admin cost per adjusted discharge (UVMHC \$3,826 vs. \$1,427 benchmark; \$1,303/discharge gap)
- Five-year cumulative deficit projections table (Conservative \$700M–\$1.4B; Realistic \$2.4B–\$3.1B)
- Per-Vermont-resident cost (\$3,700–\$4,800)
- Full source attribution

1.7 Figure A.5 — ![][image7]

Location: Appendix A, after the 14-hospital transformation table
Caption was: "Figure A.5 — Vermont's 14-Hospital Network: Three-Tier Structure"
Fix: Replaced with a structured three-tier network diagram:

- Tier 1 Regional Specialty Centers: UVMHC (16 COEs) and SVMC (9 COEs) with key specialties and financial notes
 - Tier 2 Community Hospitals: all 8 mid-tier hospitals with COE counts and key challenges
 - Tier 3 Transition Assessment: all 4 CAHs (Gifford, NCH, MAHHC, Grace Cottage) with repurposing pathways
 - Three repurposing models listed (REH, CACC, Care at Home)
 - Vermont CIN role noted at bottom
 - Full source attribution
-

1.8 Figure A.7 —

Location: Appendix A, Section A.6 "The Insurance and Premium Crisis"
Caption was: "Figure A.7 — Vermont Premium vs. Income Growth 2018–2024"
Fix: Replaced with an ASCII bar chart:

- Two-line chart showing premium trajectory (░░ blocks) vs. income (■ blocks) 2018–2024
- Y-axis indexed to 100 at 2018
- Key data points callout box: \$456→\$948 (+108%), income +22%, hospital charges +38%, BCBS VT PMPM \$481→\$812 (+69%)
- Driver identified: UVMHC outpatient charges ≈417% of Medicare (2022)
- Policy response noted: Act 68 RBP (FY2027)
- Full source attribution

CATEGORY 2 — CONTENT CORRECTED TO MATCH CODEBASE

2.1 VBC Readiness Assessment — 6 Domains (Chapter 6)

Location: Chapter 6, "The Six Readiness Domains"
Problem: The book described 6 domains that did not match the actual tool:

- Book: Strategic Clarity, Data/Technology, Care Delivery, Network/Partnerships, Revenue Cycle, Workforce Operations
- Actual tool: Strategy & Leadership (Policy), Data & Analytics (Technology), Clinical Operations (Clinical), Financial Readiness (Economics), Technology Infrastructure (Technology), Health Equity (Equity)

Fix: Complete rewrite of all 6 domain descriptions to match the actual codebase (VBCReadinessAssessment.tsx), including:

- Correct domain names and pillar alignments
- All 5 dimensions per domain with descriptions
- Vermont-specific notes for each domain (e.g., "VHCURES access and AHEAD data reporting infrastructure are prerequisites")
- Platform links (e.g., "/research-lab/technology-ai?tab=ai for the 65-dimension governance evaluation")

2.2 VBC Readiness Assessment — Scoring Scale (Chapter 6)

Location: Chapter 6, "VBC Readiness Scoring — What the Numbers Mean"
Problem: Book said "scored 1-4: Pre-transition (1), Developing (2), Operational (3), Optimized (4)" — wrong
Actual tool: 0–4 scale with 5 levels: Not Started (0), Early Stage (1), In Progress (2), Advanced (3), Optimized (4)
Fix:

- Updated scoring table with correct 5-level 0–4 scale and label meanings
- Updated readiness thresholds to percentage-based (80%+ = Global Budget Ready; 60–79% = Advanced; 40–59% = In Progress; 20–39% = Early Stage; below 20% = Foundation Required)
- Replaced "below 60/120" threshold language throughout

2.3 VBC Readiness Assessment — Vermont Presets (Chapter 6)

Location: Chapter 6, after scoring table
Problem: Vermont presets were not documented in the book at all
Actual tool: Has 3 Vermont preset scenarios built in

Fix: Added full documentation of all 3 Vermont presets:

1. **Vermont Hospital — AHEAD Entry (FY2027):** Strong strategy (Domain 1: ~3), reasonable clinical (Domain 3: ~2–3), data analytics gaps (Domain 2: ~2), limited equity (Domain 6: ~1–

- 2)
- 2. **Vermont CAH — Early Transformation:** Minimal analytics (Domain 2: ~1), early-stage data infrastructure (Domain 5: ~0–1), very limited financial VBC modeling
- 3. **Integrated Health System — Advanced VBC:** Optimized data and analytics (~4), strong clinical (~3–4), robust financial modeling, advanced equity infrastructure

2.4 HTR Platform Description — Introduction

Location: Introduction, "The HTR Platform and This Book"
Problem: Book mentioned "the Clinical Quality Optimizer" — a tool that does not exist in the platform
Fix: Replaced with correct tool names:

- VBC Transformation Readiness Assessment (30 dimensions in all six pillar domains)
- Health Equity Studio (HEROI scoring)
- Hospital Financial Stress Test (RBP and global budget scenarios)
- AI Analyst (right-sidebar widget throughout platform and at /chat)

2.5 Appendix E — All Tool Descriptions Rewritten

Location: Appendix E (E.1 through E.10)
Problem: Descriptions were generic, had wrong scoring (1–4 instead of 0–4), wrong domain names, no platform locations, and were missing the AI Analyst entirely
Fix: Full rewrite of all entries adding:

- Platform location for each tool (e.g., /research-lab/payment-models?tab=apm-calc)
- Correct descriptions matching actual tool behavior
- Vermont-specific preset information
- Accurate scoring thresholds

Added E.11 — HTR AI Analyst (new entry):

- Platform location: /chat (full interface) and right-sidebar widget
- Description: on-demand framework intelligence grounded in complete HTR knowledge base
- Source documents listed (Acts 167, 51, 68, AHEAD Agreement, Oliver Wyman report, AHS reports)
- Example queries included

2.6 Chapter 14 — Key Concepts Table Updated

Location: Chapter 14, Key Concepts section
Problem: HTR platform definitions were outdated
Fix: Updated 4 entries:

- HTR Intelligence Feed → renamed to "HTR Intelligence Feed (The Wire)" with correct /the-wire URL
- HTR Research Lab → updated with complete current tool list
- HTR Academy → added /academy URL and /academy/personalized-learning mention
- Added new entry: **HTR AI Analyst** — on-demand framework intelligence at /chat
- Updated HEROI entry to include /research-lab/equity location

2.7 Chapter 14 — HTR Implementation Toolkit Table

Location: Chapter 14, "The HTR Implementation Toolkit"
Problem: Tool table had no platform locations, wrong descriptions, and was missing several current tools
Fix: Complete rewrite of the table adding:

- Pillar column for each tool
- Platform location for every tool
- Updated descriptions matching actual tool behavior
- Added Vermont Reform Cascade Tracker (/vermont-act-68) as a new entry

- Added AI Analyst description with typical use cases

CATEGORY 3 — CROSS-REFERENCE ERRORS FIXED (11 errors)

3.1 "Act 168" Typo

Location: Chapter 1, line ~698
Error: "Vermont's Act 168 goals explicitly include reducing health inequities..."
Fix: Changed to "Vermont's Act 167 and Act 68 goals..."

3.2 Chapter 11 Opening Cross-Reference

Location: Chapter 11, first paragraph
Error: "Chapter 12 established the Vermont equity landscape..."
Fix: Changed to "Chapter 10 established the Vermont equity landscape..."

3.3 Chapter 11 Root Cause Taxonomy Reference

Location: Chapter 11, "Root Cause Analytics" section
Error: "The five-category root cause taxonomy from Chapter 12..."
Fix: Changed to "The five-category root cause taxonomy from Chapter 10..."

3.4 Chapter 12 Self-Reference Error

Location: Chapter 13 opening
Error: "Chapters 12 and 13 established Vermont's technology architecture..."
Fix: Changed to "Chapter 12 established Vermont's technology architecture..."

3.5 "Part V" References (×2)

Location: Chapter 12, AI and Digital Health section
Error: "The book's Part V discussion of diagnostic AI maturation..." and "The book's Part V discussion of AI governance..."
Problem: No "Part V" exists in this book
Fix:

- Changed to "The broader discussion of diagnostic AI maturation..."
- Changed to "Chapter 13's treatment of AI governance..."

3.6 Figure 1.5 — Clinical Pillar Chapter Reference

Location: Chapter 1, Figure 1.5 (Vermont six-pillar transformation map)
Error: Clinical row pointed to "Chapter 10: The Equity Pillar"
Fix: Changed to "Chapter 9: The Clinical Pillar — Redesigning Care Delivery for a Transformed System"

3.7 Figure 1.5 — Equity Pillar Chapter Reference

Location: Chapter 1, Figure 1.5
Error: Equity row pointed to "Chapter 12: The Technology Pillar"
Fix: Changed to "Chapter 10: The Equity Pillar — Closing Gaps, Not Just Averaging Them"

3.8 Figure 1.5 — Operations Pillar Chapter Reference

Location: Chapter 1, Figure 1.5
Error: Operations row said "Chapters 8, 11"
Fix: Changed to "Chapters 7 and 8"

3.9 Introduction — Executive Reading Path

Location: Introduction, "The Healthcare Executive or Administrator" reading path
Error: "If you are building care management programs, Chapter 10 (Clinical)"
Fix: Changed to "Chapter 9 (Clinical)"

3.10 Broken Framework Map URL

Location: Chapter 1, Key Concepts table, "six-pillar framework map" entry
Error: URL was "relevant policy monitoring resources/framework" — a broken placeholder
Fix: Changed to "htrintelligence.com/framework"

3.11 Table of Contents — Missing Chapter 2

Location: Table of Contents
Error: TOC jumped from Chapter 1 directly to Chapter 3 — Chapter 2 ("The Execution Sequence") was absent
Fix: Added entry: [**Chapter 2: The Execution Sequence – Why Order Is Not Optional**
39]

3.12 Conclusion — Misattributed Quote

Location: Conclusion, "What the Six Pillars Prove" section
Error: A quote was attributed to "— Chapter 3, this volume" but the quote appears in Chapter 15
Fix: Changed to "— Chapter 15, this volume"

CATEGORY 4 — PRINT/FORMATTING FIXES

4.1 Premium Table (Chapter 5) — Broken Table Format

Location: Chapter 5, Figure 5.2 ("Vermont average monthly silver marketplace premium 2018–2024")
Problem: Table had three columns, one of which was empty, dollar signs placed after numbers (456\$), and no header row. Would print as a poorly formatted three-column mess.
Fix: Replaced with a clean 4-column table:

- Columns: Year | Monthly Premium | Year-over-Year Change | vs. 2018 Baseline
 - Correct formatting (\$456, \$474, etc.)
 - Summary line: "Six-year total increase: +108%. Median household income growth: +22%. The gap — 86 percentage points — is the affordability crisis in a single table."
-

4.2 Tier Headings (Chapter 7) — Single-Column Tables Used as Headings

Location: Chapter 7, "The Regional Network Design Framework"
Problem: Three tier descriptions used | Tier 1 – ... | / | :---- | single-column table syntax as visual headings — prints as thin table boxes, not readable headings
Fix: Converted all three to proper ### markdown section headings:

- ### **Tier 1 – Regional Specialty Centers (RSCs)**
 - ### **Tier 2 – Community Hospitals with Focused Scope**
 - ### **Tier 3 – Transformed Facilities (REH, CACC, or Home-Based Models)**
-

4.3 Figure 16.6 (Chapter 16) — Merged Cell Table

Location: Chapter 16, after "The Central Commitment the Plan Must Make"

Problem: Two-cell merged table with run-on text mixing a statutory deadline, advisory committee description, dollar amounts, and savings figures — no headers, impossible to scan

Fix: Replaced with a clean 9-row parameter table with columns: Strategic Plan parameter | Value | Source

Entries include: statutory deadline, update frequency, committee member count, RHT capital, RHT spending deadline, EAST Fund, Oliver Wyman savings projection, Act 68 grants, GMCB positions

4.4 Blank Separator Lines Before Chapters 2 and 3

Location: Between Chapter 1 and Chapter 2; between Chapter 2 and Chapter 3

Problem: Raw \# and # lines (escaped and blank heading markers) used as spacers — would print as visible # characters or empty heading boxes

Fix: Replaced with --- horizontal rule dividers

4.5 Chapter 2 — Missing Proper Heading

Location: Chapter 2 opening

Problem: Chapter 2 used bold text (**Chapter 2: The Execution Sequence...**) as its heading instead of a # heading — inconsistent with all other chapters

Fix: Changed to # **Chapter 2: The Execution Sequence – Why Order Is Not Optional** and added subtitle: *"From the OneCare Failure to the Correct Six-Stage Build: How Dependency Logic Determines the Sequence That Makes Transformation Work"*

CATEGORY 5 — NEW CONTENT ADDED

5.1 Quick-Reference Card (Before Preface)

Location: Added as a standalone page between Table of Contents and Preface

Content: A tear-out reference card containing:

- Full 6-pillar table with columns: Pillar | Diagnostic Question | Core Mechanism | Vermont Instrument | Key Chapter
- All 15 dependencies listed in compact format by pillar grouping
- The execution sequence (Policy → Technology → Economics → Clinical → Equity → Operations)
- Vermont's crisis in three numbers (9/14 hospitals, \$2.4B deficit, 108% premium increase)
- HTR platform quick access (/research-lab, /the-wire, /chat)
- Purpose: readers who open to any chapter can orient themselves without reading from the front

5.2 Conclusion — Sources Citation Block

Location: End of Conclusion section, before Chapter 16

Problem: Every chapter in the book ends with a ***Sources: ...*** citation block — the Conclusion had none

Fix: Added a full sources block citing:

- Oliver Wyman Act 167 Report (August 2024)
 - Acts 167 (2022) and 68 (2025)
 - Vermont AHEAD State Agreement (January 2025)
 - AHS Transformation Reports (August and November 2025)
 - Vermont RHT Program Application (November 2025)
 - GMCB Act 68 Update (February 2026)
 - Vermont Department of Health Health Equity Data Report (January 2025)
 - Vermont Blueprint for Health Annual Report (2024)
 - "all primary sources cited in Chapters 1–16"
-

5.3 VBC Readiness Assessment — Sample Completed Scoring (Chapter 6)

Location: Chapter 6, after the Vermont presets section

Content: A full 30-dimension scored example using the "Vermont Hospital — AHEAD Entry"

preset:

- All 30 dimensions listed with score (0–4) and label
- Domain subtotals (e.g., "Domain score: 12/20 = 60%")
- Domain 2 (Data & Analytics) flagged as "Binding constraint"
- Overall: 56/120 = 47% → "In Progress — 2–3 years to readiness"
- 4 priority gaps identified before AHEAD launch (FHIR compliance, attribution analytics, behavioral health integration, HCC coding accuracy)
- Call to action pointing to /research-lab/payment-models?tab=vbc-readiness

COMPLETE CHANGE LOG — QUICK REFERENCE

#	Type	Location	What Changed
1	Image→Diagram	Cover	! [] [image1] → ASCII title frame
2	Image→Diagram	Ch 1 Fig 1.1	! [] [image2] → Six-pillar hexagon diagram
3	Image→Diagram	Ch 1 Fig 1.3	! [] [image3] → All 15 dependency relationships
4	Image→Diagram	Ch 2 Fig 2.1	! [] [image4] → Six-stage execution sequence flow
5	Image→Diagram	Ch 2 Fig 2.2	! [] [image5] → OneCare failure cascade diagram
6	Image→Data	App A Fig A.3	! [] [image6] → Hospital financial data charts
7	Image→Diagram	App A Fig A.5	! [] [image7] → Three-tier hospital network map
8	Image→Chart	App A Fig A.7	! [] [image8] → Premium vs. income growth chart
9	Content	Ch 6	VBC domains: wrong 6 → correct 6 (codebase-aligned)
10	Content	Ch 6	VBC scoring: 1–4 → 0–4 with correct 5 labels
11	Content	Ch 6	VBC thresholds: fixed/120 → percentage-based
12	Content	Ch 6	Added 3 Vermont presets documentation
13	Content	Introduction	"Clinical Quality Optimizer" (fake) → real tool names
14	Content	App E (all)	Rewrote E.1–E.10 with platform locations + correct descriptions
15	Content	App E	Added E.11 — HTR AI Analyst (was missing entirely)
16	Content	Ch 14 Key Concepts	Updated all 4 HTR platform definitions
17	Content	Ch 14 Toolkit	Rewrote tool table with pillar, location, updated descriptions
18	Error	Ch 1 line 698	"Act 168" → "Act 167 and Act 68"
19	Error	Ch 11 opening	"Chapter 12 established equity landscape" → "Chapter 10"
20	Error	Ch 11 body	"taxonomy from Chapter 12" → "from Chapter 10"
21	Error	Ch 13 opening	"Chapters 12 and 13 established" → "Chapter 12 established"
22	Error	Ch 12	"Part V discussion of diagnostic AI" → "The broader discussion"
23	Error	Ch 12	"Part V discussion of AI governance" → "Chapter 13's treatment"
24	Error	Ch 1 Fig 1.5	Clinical row chapter: Ch 10 (Equity) → Ch 9 (Clinical)
25	Error	Ch 1 Fig 1.5	Equity row chapter: Ch 12 (Technology) → Ch 10 (Equity)
26	Error	Ch 1 Fig 1.5	Operations row: "Chs 8, 11" → "Chapters 7 and 8"
27	Error	Introduction	Executive reading path: "Ch 10 (Clinical)" → "Ch 9 (Clinical)"
28	Error	Ch 1 Key Concepts	Broken placeholder URL → htrintelligence.com/framework
29	Error	TOC	Missing Chapter 2 entry → added
30	Error	Conclusion	Quote misattributed "Chapter 3" → "Chapter 15"
31	Format	Ch 5 Fig 5.2	Broken 3-column premium table → clean 4-column table
32	Format	Ch 7	Tier 1/2/3 single-col table headers → ### headings
33	Format	Ch 16 Fig 16.6	Merged-cell table → clean 9-row parameter table
34	Format	Ch 1→2 break	\# \# blank lines → --- divider
35	Format	Ch 2→3 break	# # # blank lines → --- divider

#	Type	Location	What Changed
36	Format	Ch 2 heading	Bold text heading → proper # heading + subtitle
37	New content	Before Preface	Quick-reference card added (6 pillars + 15 deps + sequence)
38	New content	Conclusion	Sources citation block added (was only chapter missing one)
39	New content	Ch 6	Sample 30-dimension scored assessment (Vermont AHEAD Entry)

Report generated: April 27, 2026
Output file: HTR_Book_v24.md (edited in place)
Total changes: 39
